Animal Classification

1. What are the 7 levels of classification for organisms?

2. What are the 5 kingdoms of living things?

3. How many phyla are there in the animal kingdom?

4. Name each phylum in the animal kingdom, state the characteristics of each phylum and give an example of an animal in the phylum.

5. In the chordate phylum, how many classes are there? Name each one, the features the animals in the class have in common and give an example of an animal in each class.

6. How many classes are there in the arthropod phylum? Name each one, the features the animals in the class have in common and give an example of an animal in each class.

7. For each of the animals below, name the phylum it belongs to.
   - Starfish
   - Monkey
   - Ant
   - Pelican
   - Prawn
   - Snail
   - Squid
   - Sea urchin
   - Tape worm
   - Leech
   - Sea anemone
   - Meerkat

8. For each of the chordates below, name its class.
   - Turtle
   - Cow
   - Bearded dragon
   - Duck
   - Crocodile
   - Green tree frog
   - Shark
   - Magpie
   - Cane toad
   - Lion
   - Eagle
   - Tuna
   - Alligator
   - Moose

9. For each of the arthropods below, name its class.
   - Dung beetle
   - Huntsman spider
   - Earwig
   - Scorpion
   - Wasp
   - Lobster
   - Millipede
   - Crab
