The particle model

1. All substances are made of _____
2. Particles have _____ which is where they _____ around
3. Kinetic energy increases when temperature _____

Property	Solids	Liquids	Gases
Density			
Compression			
Shape			
Diffusion			

Use the following words to fill in the blanks: Mixture, Molecule, Element, Compound

1. Two or more atoms joined together is a _____
2. A molecule where all the atoms are the same is an _____
3. A molecule where the atoms are different is a _____
4. When there are different types of molecules in one area that is a _____
5. Elements are molecules but compounds are not **True / False**
6. One atom by itself is a molecule **True / False**
7. One atom by itself is an element **True / False**
8. A mixture is the same thing as a compound **True / False**
9. A pure substance can be an element or compound **True / False**
10. The bonds between atoms in elements being rearranged to become compounds is a **chemical / physical change**
11. Substances being mixed together to form a mixture is a **chemical / physical change**
12. In a chemical reaction, more atoms are produced **True / False**
