Creating a food web

Name:_____Class:_____Date: _____

1 Food webs are created when a number of food chains are joined together. Create a food web using the information from the following ten food chains. They have many organisms in common. Each organism appears only once in the food web.

Grasses →Insects → Kookaburra
Grasses → Bandicoot → Goanna
Melaleuca tree → Honey eater → Goanna
Grasses →Insects → Frog → Goanna
Grasses →Insects → Frog → Carpet snake
Grasses →Insects → Insect eating birds → Goanna →Carpet snake
Grasses →Insects → Frog → Water rat → Goanna → Carpet snake
Grasses →Insects → Insect eating birds → Feral cat
Grasses →Bandicoot → Feral cat
Melaleuca tree → Squirrel glider → Feral cat
