Changing States of Matter Quiz

1. Which of the following are examples of liquids?

- Wood and paper
- Shampoo and oil
- Shoes and socks

2. Butter going soft and runny on a hot day is an example of ...

- freezing
- melting
- condensing

3. What is the missing word? When water is...., it starts to change from a liquid to a solid.

- cooled
- heated
- boiled

4. Once a solid has turned to a liquid, can it be changed back to a solid again?

- No, it can never be turned back into a solid
- Yes, by heating it
- Yes, by cooling it

5. Clouds are formed by ...

- rain falling
- hot air rising
- water vapour condensing

6. A gas condenses into a liquid when it is...

- cooled
- warmed
- boiled

7. Which process is the opposite of condensation?

- Melting
- Freezing
- Evaporation

8. What happens during evaporation?

- A gas changes to a liquid
- A solid changes to a liquid
- A liquid changes to a gas

9.The movement of water around and around our world is called...

- condensation
- the water cycle

- evaporation

10. Which of these is NOT a part of the water cycle?

- The Sun evaporates water on the Earth's surface into water vapour
- The water vapour rises, and cools and condenses into clouds
- When it rains, the clouds melt
