Inheritance **Crossword**

Across

3. The male sex cell. [5]

5. A possible cause of extinction. [7]

9. A section of DNA that codes for a specific characteristic. [4]

10. The gradual change of a species over time. [9]

11. How many scientists are recognised for their collaborative research on the structure of DNA. [4]

12. The number of chromosomes in a sex cell (as a fraction). [4]

13. The female sex cell. [3]

14. The strands of DNA are coiled into_____. [11]

16. The number of chromosomes in each cell of an adult human. [5,3]

17. The scientists who discovered the structure of DNA are James Watson and Francis_____. [5]

19. The genetic material in the cell (abbreviation). [3]

20. The observable differences between organisms of the same species. [9]

Down

1. The variety of plant and animal life in an ecosystem. [12]

2. The scientist that worked with Franklin in the 1950's. [7,7]

4. One of the scientists who used x-rays to study DNA in the 1950's. [8,8]

6. When genetic information is passed from parent to offspring. [9]

7. The name of the spiral ladder structure of DNA. [6,5]

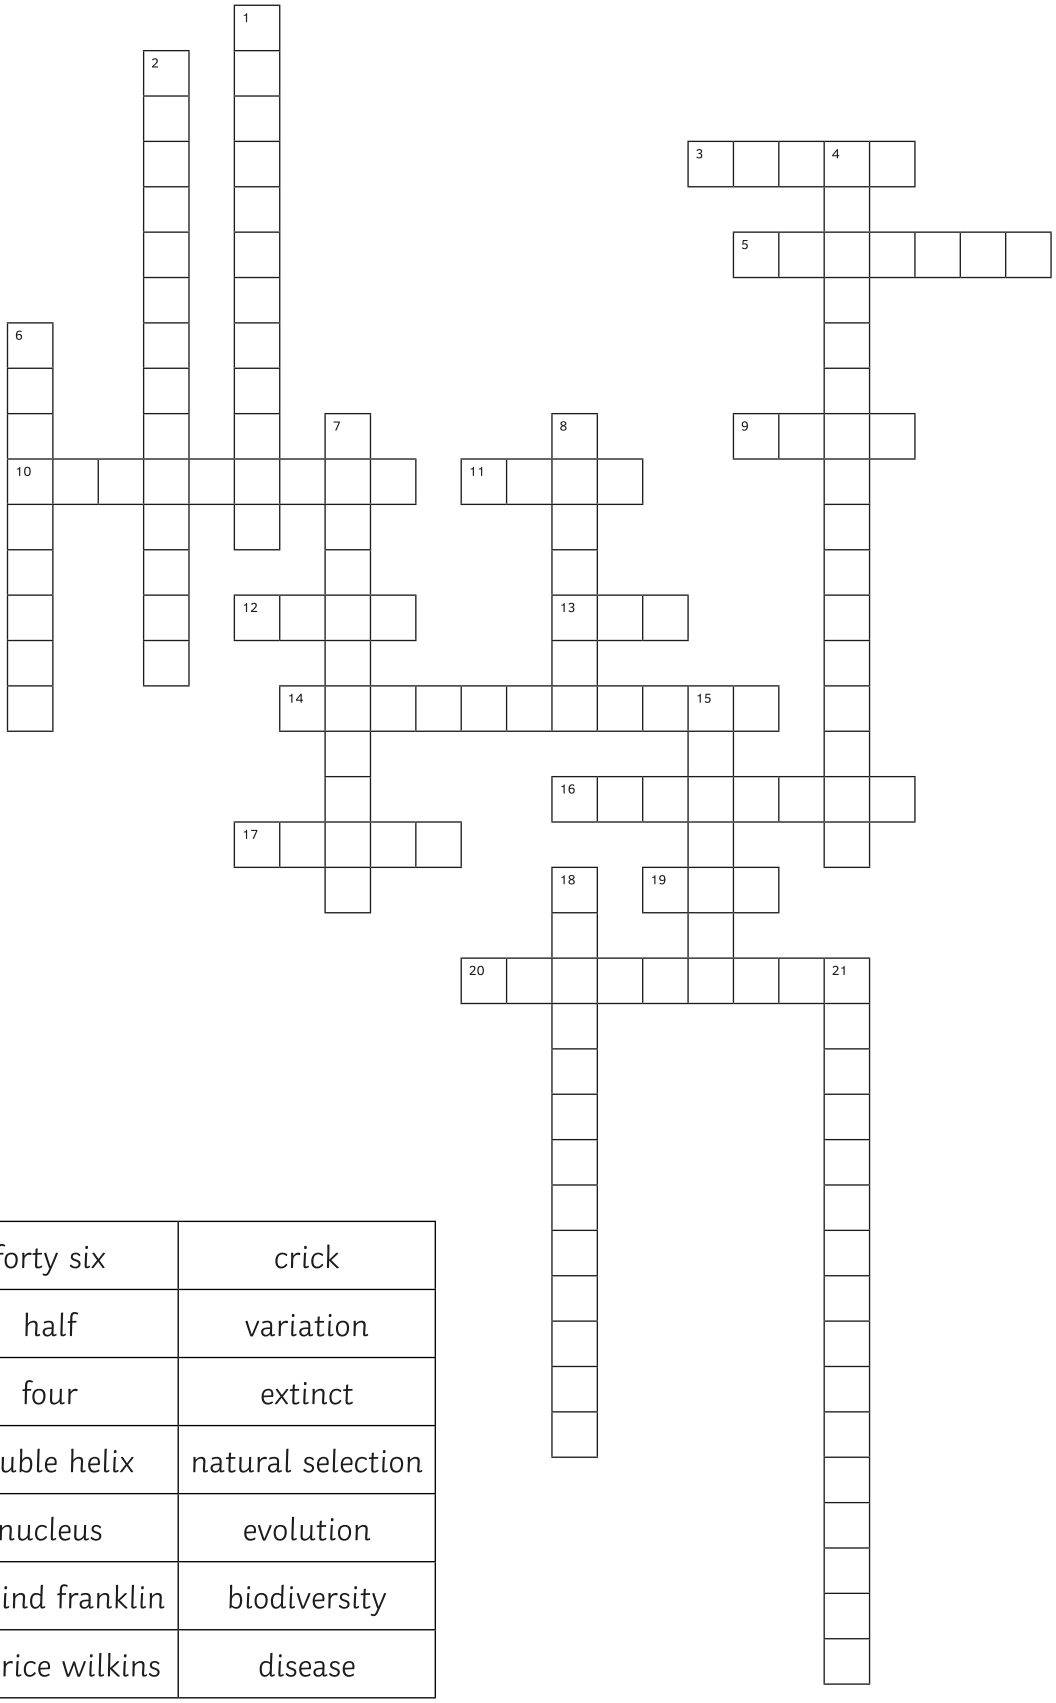

8. The part of the cell that contains the genetic information. [7]

15. When all the organisms in a species have died out, they are said to be_____. [7]

18. When an egg and sperm cell fuse. [13]

21. Darwin's theory of how members of a species with advantageous traits will survive and other will die. [7,9]

Inheritance **Crossword**

DNA	forty six	crick
gene	half	variation
chromosomes	four	extinct
inherited	double helix	natural selection
egg	nucleus	evolution
sperm	rosalind franklin	biodiversity
fertilisation	maurice wilkins	disease
