Forces and Motion **Crossword**

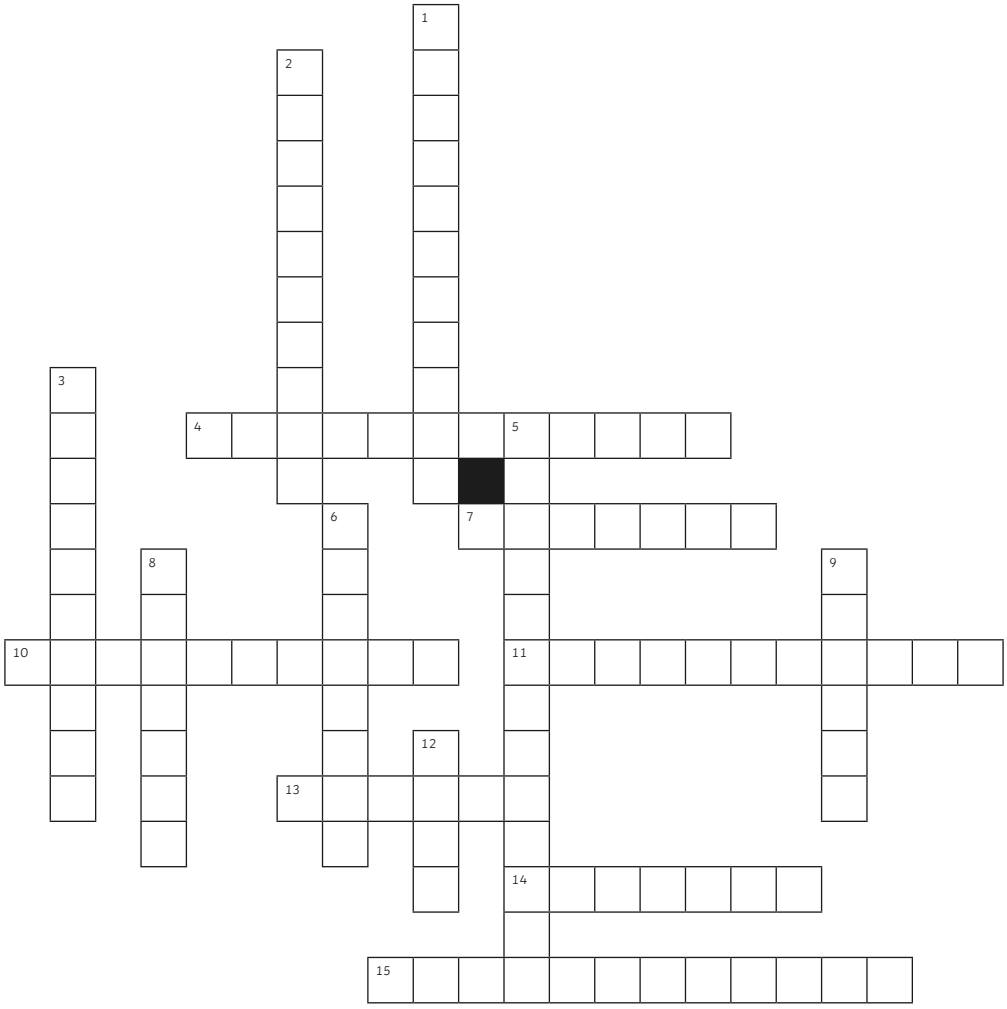

Across

4. Slowing down. [12]
7. Use of friction in cars and bikes. [7]
10. Forces that result in a change of speed and/or change of direction in moving objects. [10]
11. A property or design of something that reduces the force of air or water resistance acting on the object. [11]
13. The turning effect of a force, calculated by force x perpendicular distance. [6]
14. Unit of measurement of forces. [7]
15. Speeding up. [12]

Down

1. Equipment used to measure forces. [6,5]
2. Type of forces where objects do not need to be touching to interact. [3,7]
3. Not moving. [10]
5. Force caused by air particles slowing an object down. [3,10]
6. Force between two objects sliding past each other. [8]
8. The force that pulls objects to the centre of the Earth. [7]
9. Force produced by the effect of gravity on a mass. [6]
12. Wasteful energy transfer from friction. [4]

Forces and Motion **Crossword**

newtons	friction	decelerating
Newton meter	heat	gravity
non-contact	braking	stationary
unbalanced	streamlined	weight
air resistance	accelerating	moment
