Respiration and Gas Exchange **Crossword**

visit twinkl.com

Across

2. Something you might do that would cause the cells to start respiring anaerobically. [8]

4. A product of aerobic respiration. [5]

5. A product of human anaerobic respiration. [6,4]

7. Gases pass from or to the bloodstream by _____. [9]

8. Where in the cell that respiration occurs. [12]

10. Type of respiration that is less efficient than aerobic respiration. [9]

11. The reacting gas during a respiration reaction. [6]

12. Product of anaerobic respiration in yeast. [7]

14. Breathe in. [6]

17. Small air sacs in the lungs where gas exchange takes place. [7]

18. A machine used to measure the lung volume of a person. [10]

19. Respiration is a chemical reaction that ____ energy. [7]

Down

1. Another name for anaerobic respiration that occurs in micro-organisms. [12]

3. The muscle under the ribcage that helps to move air in and out of the lungs. [9]

6. Type of respiration that uses a gas. [7]

9. The gas produced during respiration. [6,7]

12. Breathe out. [6]

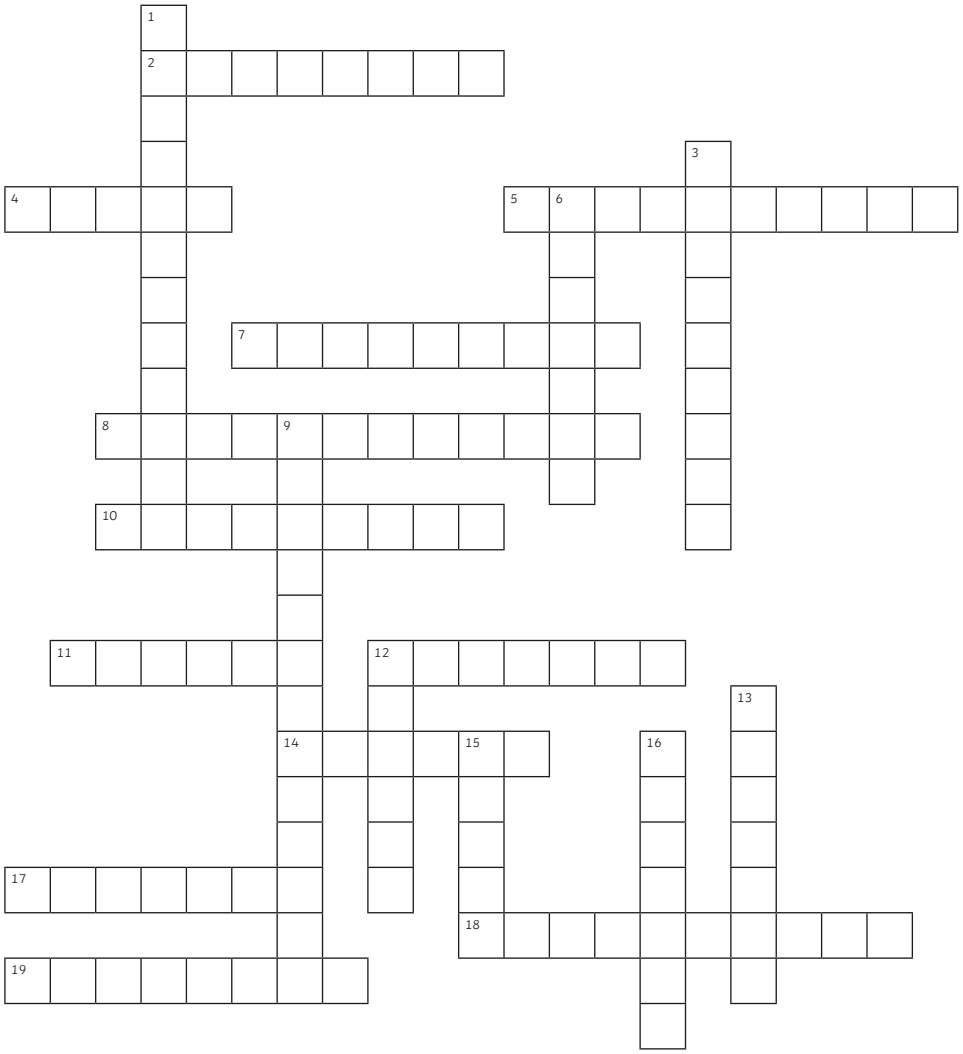

13. Lactic acid can build up here and become painful. [7]

15. Large sponge-like organs protected by the rib cage [5]

16. Sugar involved in respiration. [7]

Respiration and Gas Exchange **Crossword**

releases	carbon dioxide	fermentation
glucose	mitochondria	ethanol
aerobic	water	exercise
anaerobic	lactic acid	inhale
oxygen	muscles	exhale
lungs	diaphragm	alveoli
diffusion	spirometer
