# Adaptation of the Leaf - **Activity Sheet**

Draw a line to match the leaf adaptation with its function.

| | |
|---|---|
| **Thin** | Controls the opening and closing of stomata. |
| **Contains chlorophyll** | Allows carbon dioxide to move into the cell. |
| **Stomata** | A network of tubes to transport food. |
| **Guard cells** | To enable light to travel easily to the chloroplasts. |
| **Xylem** | A network of tubes to transport water. |
| **Phloem** | Absorbs light for photosynthesis. |
