Describe:

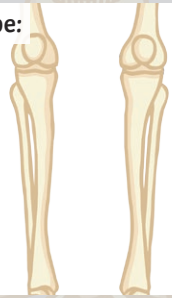

skeleton

Without using the words:

1. bones
2. skull
3. calcium
4. support
5. protect

twinkl.co.uk

Describe:

bones

Without using the words:

1. skeleton
2. body
3. protect
4. support
5. tissue

twinkl.co.uk

Describe:

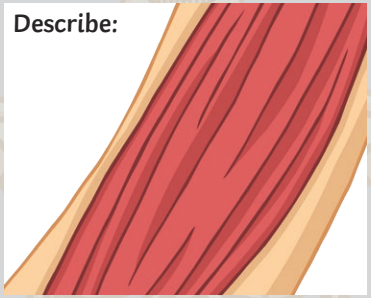

skull

Without using the words:

1. protect
2. brain
3. head
4. bone
5. spine

twinkl.co.uk

Describe:

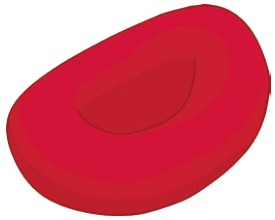

tissue

Without using the words:

1. bone
2. cell
3. organ
4. system
5. blood

twinkl.co.uk

Describe:

red blood cell

Without using the words:

1. oxygen
2. bone marrow
3. bone
4. tissue
5. body

twinkl.co.uk

Describe:

white blood cell

Without using the words:

1. defence
2. protection
3. bone marrow
4. microorganism
5. tissue

twinkl.co.uk

Describe:

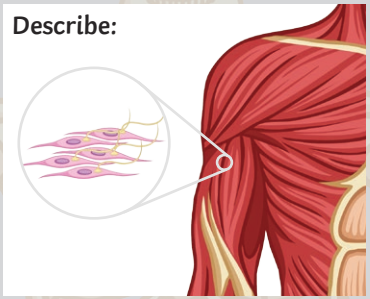

joint

Without using the words:

1. bone
2. linked
3. movement
4. arthritis
5. cartilage

twinkl.co.uk

Describe:

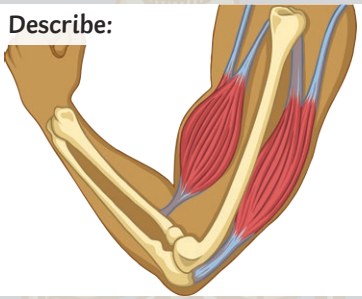

muscle

Without using the words:

1. tendon
2. bone
3. contract
4. relax
5. antagonistic

twinkl.co.uk

Describe:

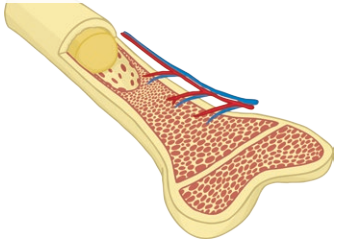

antagonistic

Without using the words:

1. muscle
2. pair
3. opposite
4. contract
5. relax

twinkl.co.uk

Describe:

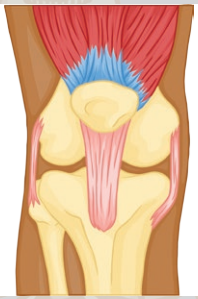

bone marrow

Without using the words:

1. soft
2. tissue
3. bone
4. white blood cells
5. red blood cells

twinkl.co.uk

Describe:

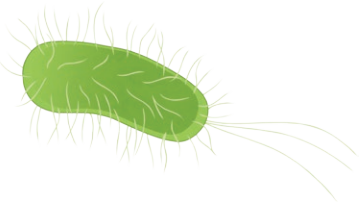

ligament

Without using the words:

1. join
2. bone
3. tough
4. tendon
5. movement

twinkl.co.uk

Describe:

microorganism

Without using the words:

1. microbe
2. microscopic
3. organism
4. bacteria
5. virus

twinkl.co.uk

Describe:

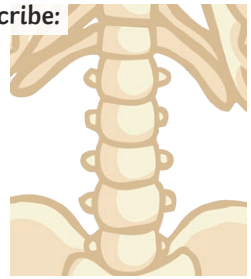

skeletal system

Without using the words:

1. skeleton
2. bones
3. support
4. protect
5. strength

twinkl.co.uk

Describe:

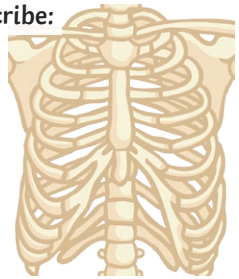

spine

Without using the words:

1. backbone
2. spinal cord
3. skull
4. protect
5. nervous system

twinkl.co.uk

Describe:

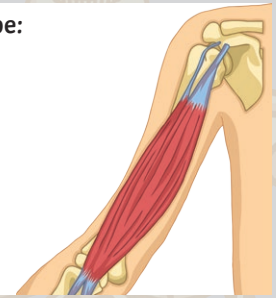

ribcage

Without using the words:

1. protect
2. lung
3. heart
4. sternum
5. chest

twinkl.co.uk

Describe:

tendon

Without using the words:

1. muscle
2. bone
3. join
4. tough
5. ligament

twinkl.co.uk
