Describe:

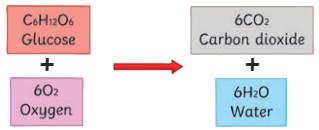

photosynthesis

without using the words:

1. sun
2. plant
3. energy
4. chloroplast
5. leaf

twinkl.co.uk

Describe:

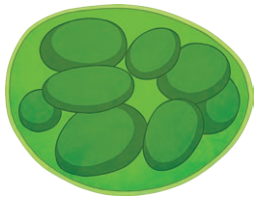

respiration

without using the words:

1. oxygen
2. breathing
3. carbon dioxide
4. photosynthesis
5. cells

twinkl.co.uk

Describe:

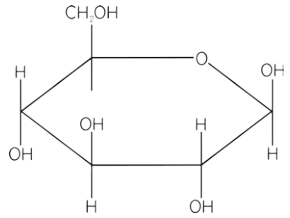

chloroplast

without using the words:

1. green
2. chlorophyll
3. disc
4. leaf
5. photosynthesis

twinkl.co.uk

Describe:

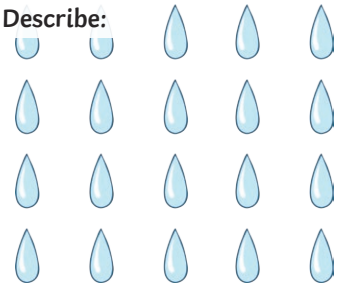

glucose

without using the words:

1. energy
2. food
3. sugar
4. photosynthesis
5. respiration

twinkl.co.uk

Describe:

water

without using the words:

1. root
2. liquid
3. H_2O
4. photosynthesis
5. plants

twinkl.co.uk

Describe:

carbon dioxide

without using the words:

1. breathing
2. oxygen
3. waste
4. diffusion
5. CO_2

twinkl.co.uk

Describe:

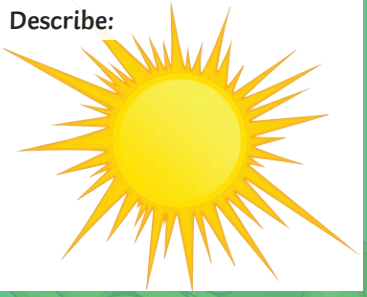

oxygen

without using the words:

1. breathing
2. carbon dioxide
3. photosynthesis
4. plants
5. O_2

twinkl.co.uk

Describe:

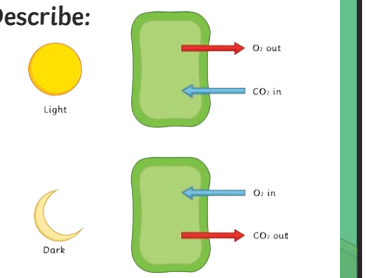

sunlight

without using the words:

1. energy
2. photosynthesis
3. leaf
4. chloroplast
5. sky

twinkl.co.uk

Describe:

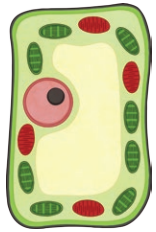

gas exchange

without using the words:

1. stomata
2. guard cells
3. oxygen
4. carbon dioxide
5. photosynthesis

twinkl.co.uk

Describe:

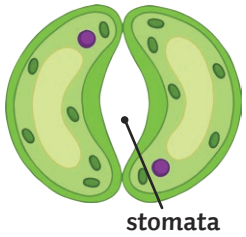

palisade cell

without using the words:

1. leaf
2. surface area
3. photosynthesis
4. chloroplast
5. chlorophyll

twinkl.co.uk

Describe:

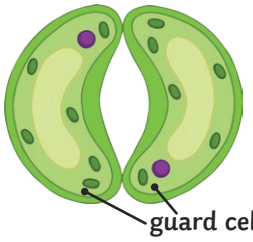

stomata

without using the words:

1. leaf
2. surface area
3. photosynthesis
4. chloroplast
5. chlorophyll

twinkl.co.uk

Describe:

guard cell

without using the words:

1. open/close
2. stomata
3. gas exchange
4. hole
5. leaf

twinkl.co.uk

Describe:

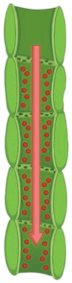

xylem

without using the words:

1. transport
2. water
3. stem
4. vessel
5. dead cells

twinkl.co.uk

Describe:

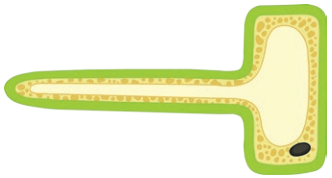

phloem

without using the words:

1. transport
2. food
3. stem
4. vessel
5. alive cells

twinkl.co.uk

Describe:

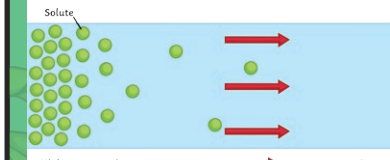

root hair cell

without using the words:

1. water
2. thin walls
3. surface area
4. osmosis
5. stem

twinkl.co.uk

Describe:

diffusion

without using the words:

1. movement
2. higher
3. lower
4. concentration
5. particles

twinkl.co.uk
