Describe:

biological weathering

without using the words:

1. breakdown
2. rocks
3. living organisms
4. trees
5. burrowing animals

twinkl.co.uk

Describe:

chemical weathering

without using the words:

1. erosion
2. rocks
3. react
4. mineral
5. rainwater

twinkl.co.uk

Describe:

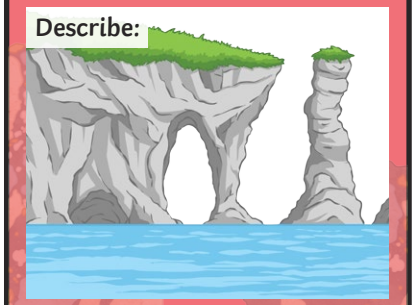

acid rain

without using the words:

1. dissolved
2. harmful
3. gases
4. sulphur dioxide
5. nitrogen oxide

twinkl.co.uk

Describe:

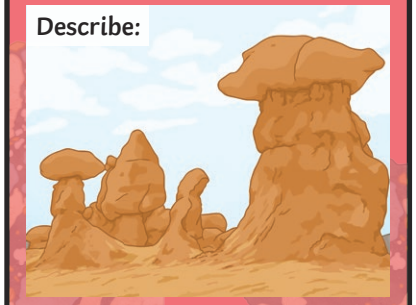

erosion

without using the words:

1. wearing away
2. rock
3. soil
4. solid
5. particle

twinkl.co.uk

Describe:

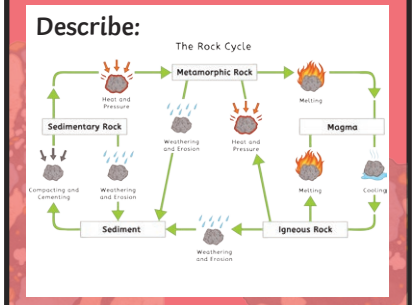

physical weathering

without using the words:

1. breakdown
2. rocks
3. temperature
4. wind
5. waves

twinkl.co.uk

Describe:

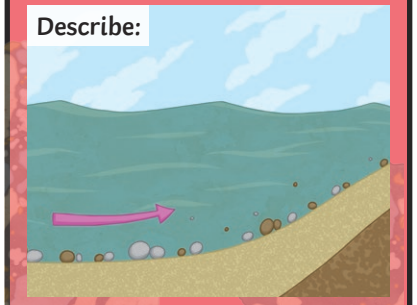

rock cycle

without using the words:

1. create
2. change
3. destroy
4. rock
5. recycled

twinkl.co.uk

Describe:

transport

without using the words:

1. move
2. rocks
3. flowing
4. river
5. water

twinkl.co.uk

Describe:

weathering

without using the words:

1. breakdown
2. rocks
3. plants
4. animals
5. chemical

twinkl.co.uk

Describe:

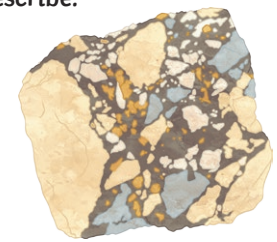

metamorphic

without using the words:

1. slate
2. marble
3. heat
4. pressure
5. change

twinkl.co.uk

Describe:

sedimentary

without using the words:

1. limestone
2. shale
3. fossil
4. layers
5. compaction

twinkl.co.uk

Describe:

igneous

without using the words:

1. basalt
2. granite
3. intrusive
4. extrusive
5. lava

twinkl.co.uk

Describe:

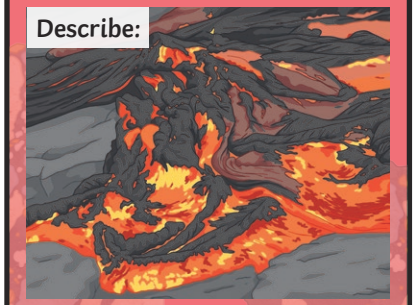

freeze-thaw

without using the words:

1. water
2. expand
3. ice
4. crack
5. rocks

twinkl.co.uk

Describe:

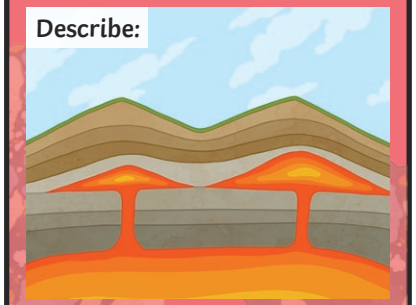

lava

without using the words:

1. magma
2. volcano
3. cools
4. extrusive
5. igneous

twinkl.co.uk

Describe:

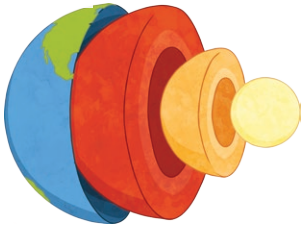

magma

without using the words:

1. melt
2. molten
3. rock
4. underground
5. heat

twinkl.co.uk

Describe:

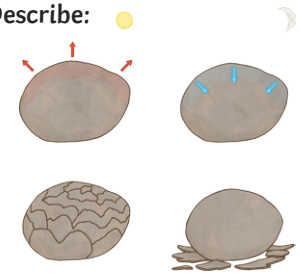

mantle

without using the words:

1. earth
2. magma
3. heat
4. pressure
5. rock

twinkl.co.uk

Describe:

onion skin

without using the words:

1. peeling
2. layers
3. heat
4. cool
5. rock

twinkl.co.uk
