Describe:

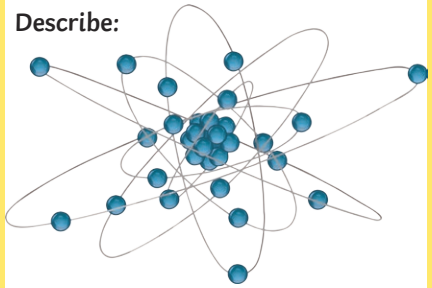

electron

without using the words:

1. subatomic
2. negative
3. negligible mass
4. shells
5. periodic table

twinkl.com

Describe:

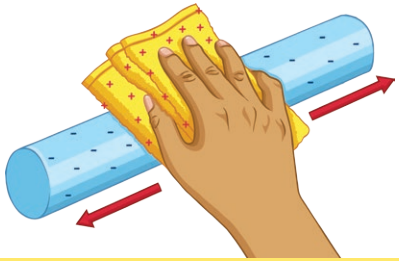

atoms

without using the words:

1. element
2. nucleus
3. proton
4. neutron
5. electron

twinkl.com

Describe:

charge

without using the words:

1. positive
2. negative
3. force
4. matter
5. electrical state

twinkl.com

Describe:

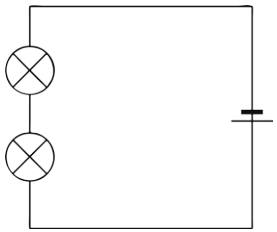

static

without using the words:

1. electric
2. charge
3. friction
4. accumulation
5. electron

twinkl.com

Describe:

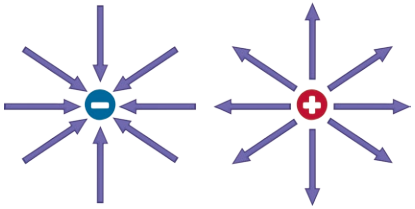

current

without using the words:

1. movement
2. electric
3. charge
4. particle
5. wire

twinkl.com

Describe:

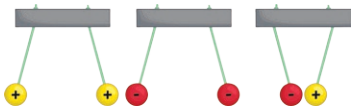

electric field

without using the words:

1. area
2. surround
3. electric
4. charge
5. influence

twinkl.com

Describe:

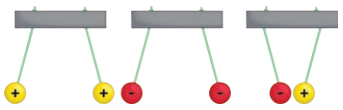

attract

without using the words:

1. together
2. magnet
3. poles
4. repel
5. pull

twinkl.com

Describe:

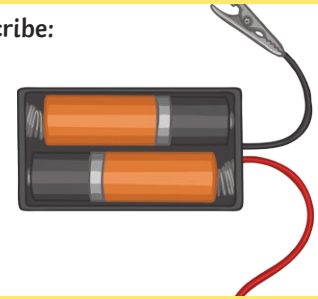

repel

without using the words:

1. push
2. apart
3. attract
4. positive
5. negative

twinkl.com

Describe:

battery

without using the words:

1. chemical
2. energy
3. store
4. volt
5. push

twinkl.com

Describe:

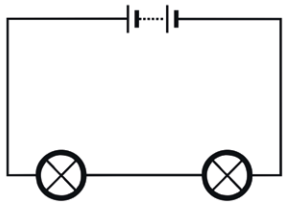

cell

without using the words:

1. store
2. energy
3. transfer
4. current
5. circuit

twinkl.com

Describe:

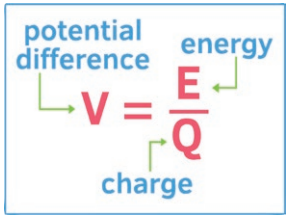

series

without using the words:

1. circuit
2. loop
3. circle
4. component
5. connect

twinkl.com

Describe:

potential difference

without using the words:

1. volts
2. energy
3. components
4. circuit
5. measure

twinkl.com

Describe:

insulator

without using the words:

1. charge
2. not allowed
3. heat
4. conductor
5. same

twinkl.com

Describe:

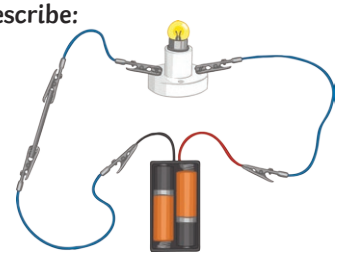

conductor

without using the words:

1. charge
2. electric
3. heat
4. metal
5. movement

twinkl.com

Describe:

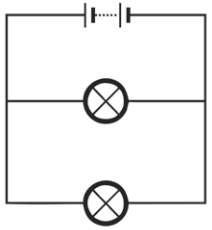

circuit

without using the words:

1. closed
2. loop
3. charge
4. energy
5. components

twinkl.com

Describe:

parallel

without using the words:

1. current
2. divide
3. branch
4. recombine
5. component

twinkl.com
