Describe:

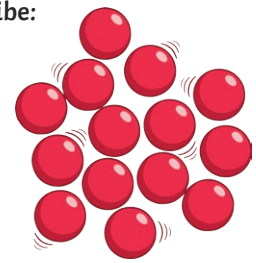

solid

without using the words:

1. hard
2. neat rows
3. particles
4. vibration
5. close

twinkl.com

Describe:

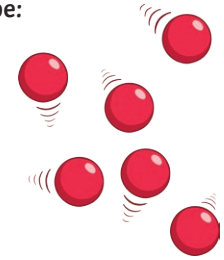

liquid

without using the words:

1. fluid
2. moving over
3. particles
4. energy
5. flow

twinkl.com

Describe:

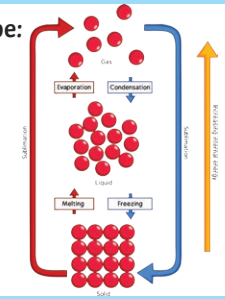

gas

without using the words:

1. air
2. freely-moving
3. bouncing
4. particles
5. energy

twinkl.com

Describe:

sublimation

without using the words:

1. solid
2. gas
3. liquid
4. missing
5. state

twinkl.com

Describe:

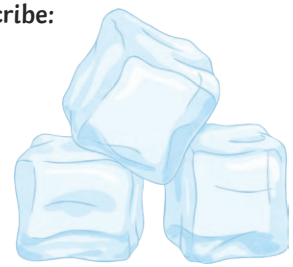

condensing

without using the words:

1. gas
2. liquid
3. cold
4. close
5. slow

twinkl.com

Describe:

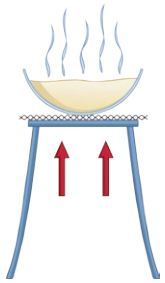

freezing

without using the words:

1. liquid
2. solid
3. cold
4. vibrate
5. slow

twinkl.com

Describe:

evaporation

without using the words:

1. liquid
2. gas
3. heat
4. random
5. particle

twinkl.com

Describe:

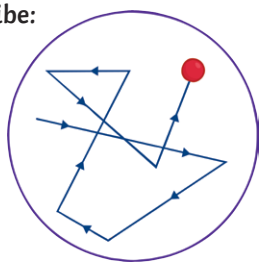

melting

without using the words:

1. solid
2. liquid
3. heat
4. random
5. particle

twinkl.com

Describe:

Brownian motion

without using the words:

1. random
2. movement
3. particles
4. gas
5. collision

twinkl.com

Describe:

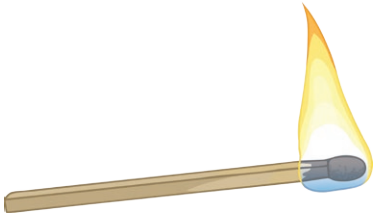

solution

without using the words:

1. mixture
2. solute
3. solvent
4. substance
5. dissolved

twinkl.com

Describe:

irreversible

without using the words:

1. change
2. permanent
3. undone
4. state
5. reversible

twinkl.com

Describe:

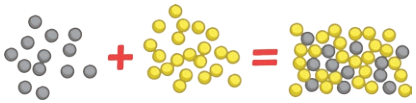

reversible

without using the words:

1. temporary
2. change
3. previous
4. state
5. restored

twinkl.com

Describe:

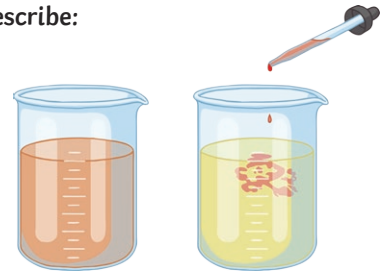

solute

without using the words:

1. substance
2. dissolved
3. solution
4. mixture
5. solvent

twinkl.com

Describe:

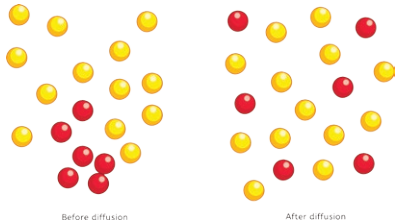

solvent

without using the words:

1. liquid
2. solute
3. dissolve
4. solution
5. formed

twinkl.com

Describe:

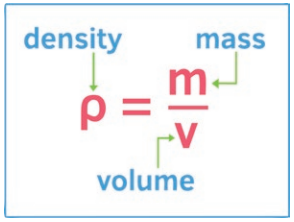

diffusion

without using the words:

1. high
2. concentration
3. low
4. movement
5. particle

twinkl.com

Describe:

density

without using the words:

1. heavy
2. mass
3. solid
4. volume
5. ratio
