Describe:

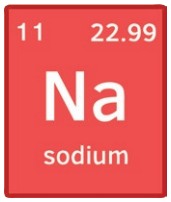

atom

without using the words:

1. element
2. nucleus
3. proton
4. neutron
5. electron

twinkl.co.uk

Describe:

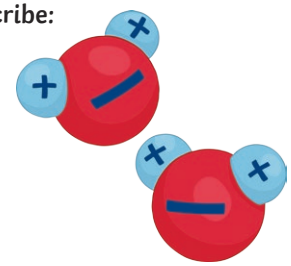

element

without using the words:

1. one type
2. atom
3. periodic table
4. pure
5. molecule

twinkl.co.uk

Describe:

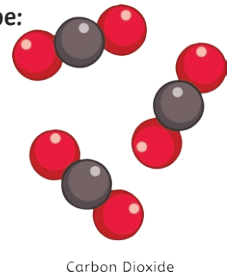

molecule

without using the words:

1. two or more
2. atom
3. joined
4. chemical
5. bond

twinkl.co.uk

Describe:

Carbon Dioxide

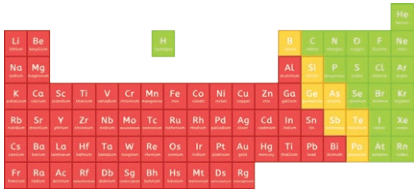

compound

without using the words:

1. chemical
2. join
3. two or more
4. elements
5. water

twinkl.co.uk

Describe:

periodic table

without using the words:

1. element
2. chemical symbol
3. Mendeleev
4. group
5. period

twinkl.co.uk

Describe:

H_2O

chemical formula

without using the words:

1. amount
2. chemical symbol
3. number
4. element
5. compound

twinkl.co.uk

Describe:

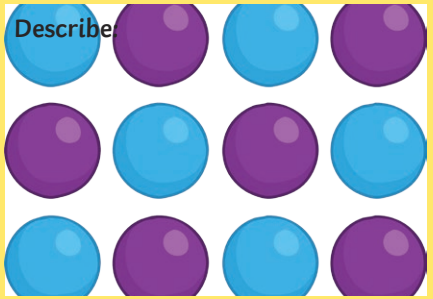

chemical symbol

without using the words:

1. letter
2. periodic table
3. number
4. Latin
5. name

twinkl.co.uk

Describe:

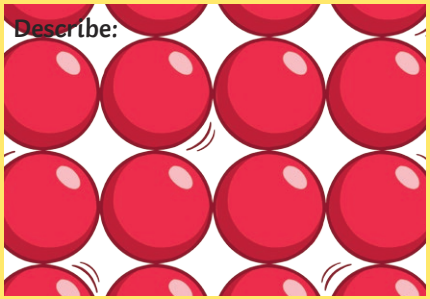

mixture

without using the words:

1. two or more
2. elements
3. joined
4. separated
5. easily

twinkl.co.uk

Describe:

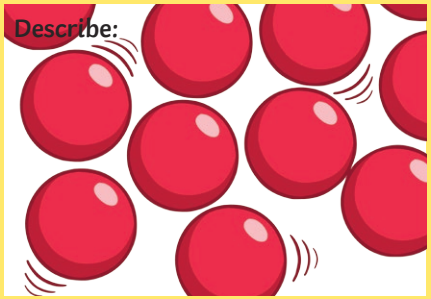

solid

without using the words:

1. hard
2. neat rows
3. particles
4. vibration
5. close

twinkl.co.uk

Describe:

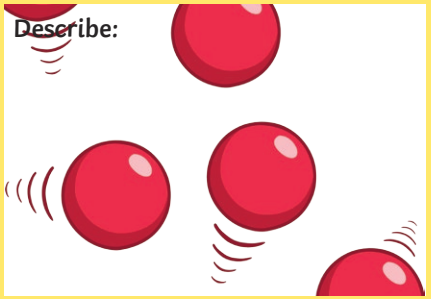

liquid

without using the words:

1. fluid
2. moving over
3. particles
4. energy
5. flow

twinkl.co.uk

Describe:

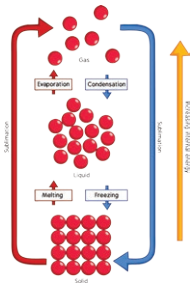

gas

without using the words:

1. air
2. freely moving
3. bouncing
4. particles
5. energy

twinkl.co.uk

Describe:

state

without using the words:

1. gas
2. solid
3. liquid
4. change
5. atom

twinkl.co.uk

Describe:

Dalton

without using the words:

1. atomic theory
2. atoms
3. matter
4. particle
5. subatomic

twinkl.co.uk

Describe:

conservation

without using the words:

1. same
2. amount
3. maintain
4. keep
5. result

twinkl.co.uk

Describe:

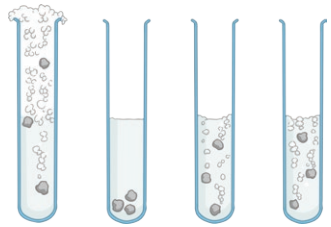

mass

without using the words:

1. amount
2. weight
3. matter
4. kilograms
5. grams

twinkl.co.uk

Describe:

reaction

without using the words:

1. chemical
2. change
3. reversible
4. irreversible
5. physical

twinkl.co.uk
