Describe:

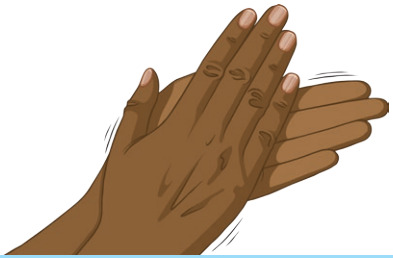

temperature

without using the words:

1. heat
2. thermometer
3. measure
4. °C
5. energy

twinkl.com

Describe:

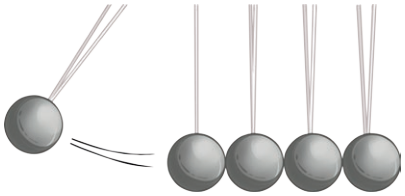

friction

without using the words:

1. heat
2. waste
3. energy
4. transfer
5. movement

twinkl.com

Describe:

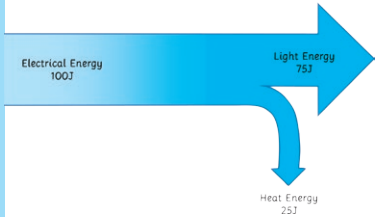

motion

without using the words:

1. movement
2. kinetic
3. drop
4. speed
5. fall

twinkl.com

Describe:

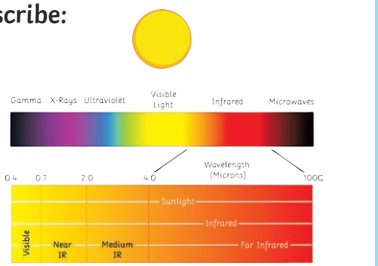

energy

without using the words:

1. Joule
2. store
3. transfer
4. particle
5. fuel

twinkl.com

Describe:

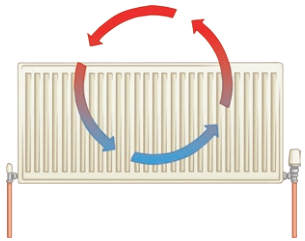

radiation

without using the words:

1. energy
2. transfer
3. surroundings
4. infrared
5. heat

twinkl.com

Describe:

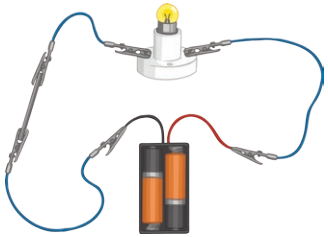

convection

without using the words:

1. particles
2. move
3. thermal
4. energy
5. transferred

twinkl.com

Describe:

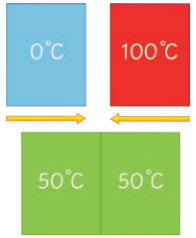

conduction

without using the words:

1. transfer
2. heat
3. through
4. material
5. kinetic energy

twinkl.com

Describe:

thermal equilibrium

without using the words:

1. two objects
2. same
3. temperature
4. transfer
5. energy

twinkl.com

Describe:

kinetic

without using the words:

1. movement
2. energy
3. speed
4. faster
5. slower

twinkl.com

Describe:

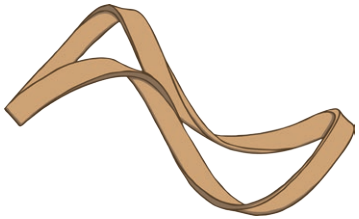

sound

without using the words:

1. noise
2. wave
3. hear
4. energy
5. wasted

twinkl.com

Describe:

elastic

without using the words:

1. shape
2. reversible
3. recoil
4. bounce
5. store

twinkl.com

Describe:

gravitational potential

without using the words:

1. gravity
2. pull
3. down
4. kinetic
5. store

twinkl.com

Describe:

thermal

without using the words:

1. heat
2. temperature
3. hot
4. wasted
5. useful

twinkl.com

Describe:

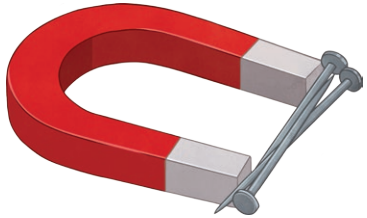

chemical

without using the words:

1. energy
2. store
3. food
4. battery
5. useful

twinkl.com

Describe:

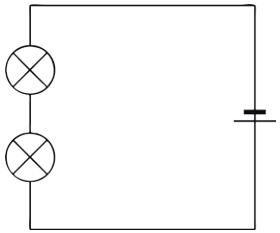

magnetic

without using the words:

1. attract
2. north
3. south
4. energy
5. field

twinkl.com

Describe:

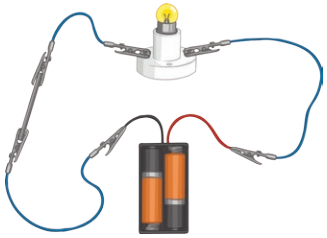

electrical

without using the words:

1. chemical
2. convert
3. store
4. energy
5. useful

twinkl.com

Describe:

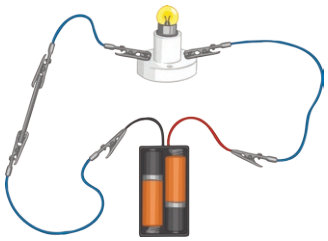

conductor

without using the words:

1. material
2. allows
3. charge
4. heat
5. move

twinkl.com

Describe:

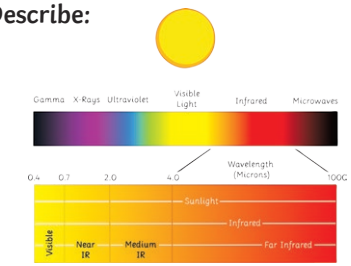

insulator

without using the words:

1. material
2. charge
3. heat
4. difficult
5. conductor

twinkl.com

Describe:

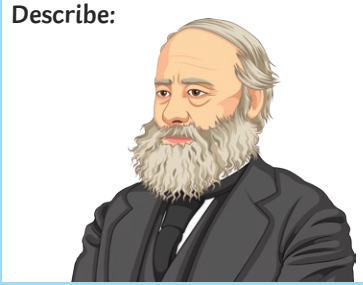

infrared

without using the words:

1. radiation
2. electromagnetic
3. emitted
4. hot
5. object

twinkl.com

Describe:

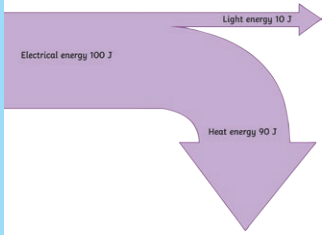

joule

without using the words:

1. unit
2. energy
3. measure
4. J
5. heat

twinkl.com

Describe:

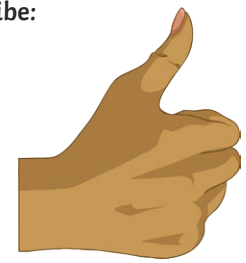

transfer

without using the words:

1. energy
2. store
3. useful
4. wasted
5. efficient

twinkl.com

Describe:

useful

without using the words:

1. wanted
2. wasted
3. efficient
4. change
5. store

twinkl.com

Describe:

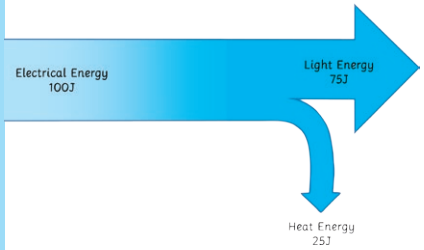

wasted

without using the words:

1. not wanted
2. useful
3. inefficient
4. dissipate
5. surroundings

twinkl.com

Describe:

Sankey

without using the words:

1. diagram
2. arrow
3. useful
4. wasted
5. energy
