Describe:

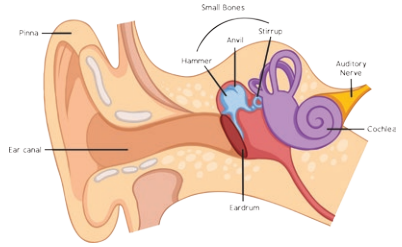

hertz

without using the words:

1. Hz
2. unit
3. frequency
4. cycle
5. second

twinkl.com

Describe:

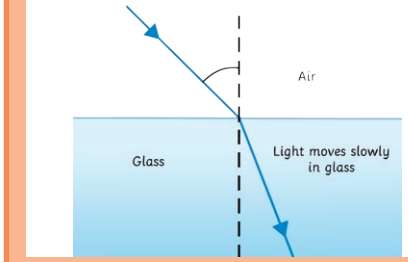

ear

without using the words:

1. detect
2. sound
3. eardrum
4. vibrate
5. pinna

twinkl.com

Describe:

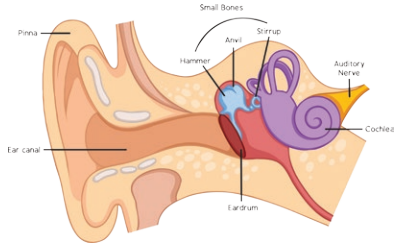

medium

without using the words:

1. solid
2. water
3. air
4. speed
5. sound

twinkl.com

Describe:

inner ear

without using the words:

1. hammer
2. anvil
3. stirrup
4. eardrum
5. bones

twinkl.com

Describe:

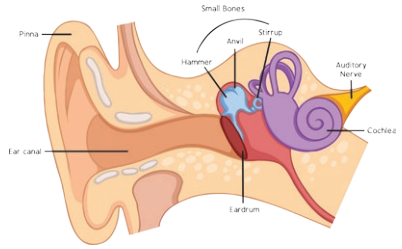

loudspeaker

without using the words:

1. sound
2. vibrating
3. energy
4. electrical
5. kinetic

twinkl.com

Describe:

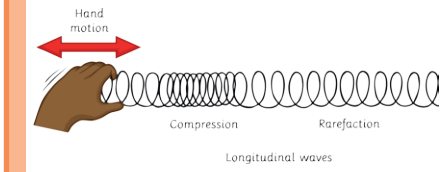

auditory

without using the words:

1. hearing
2. sound
3. range
4. human
5. animal

twinkl.com

Describe:

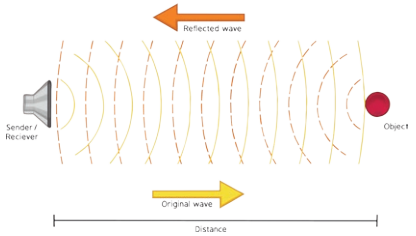

vibration

without using the words:

1. sound
2. wave
3. longitudinal
4. speaker
5. microphone

twinkl.com

Describe:

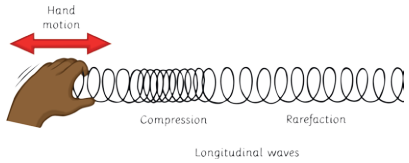

ultrasound

without using the words:

1. frequency
2. above
3. 20 000Hz
4. greater
5. animals

twinkl.com

Describe:

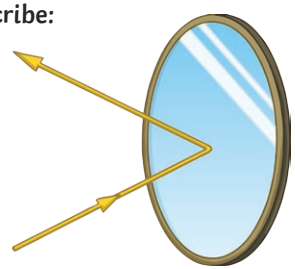

longitudinal

without using the words:

1. wave
2. direction
3. particles
4. vibration
5. same

twinkl.com

Describe:

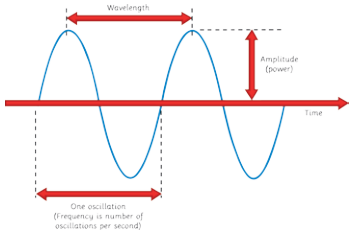

reflect

without using the words:

1. bounce
2. mirror
3. echo
4. light
5. sound

twinkl.com

Describe:

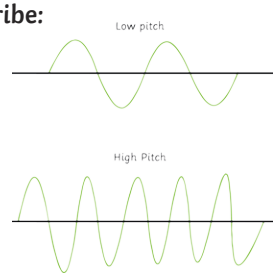

frequency

without using the words:

1. number
2. wave
3. produced
4. second
5. hertz or Hz

twinkl.com

Describe:

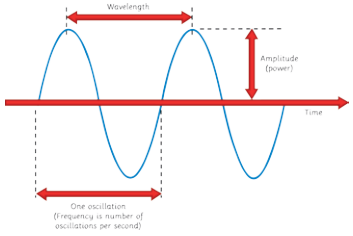

pitch

without using the words:

1. bounce
2. sound
3. high
4. frequency
5. vibration

twinkl.com

Describe:

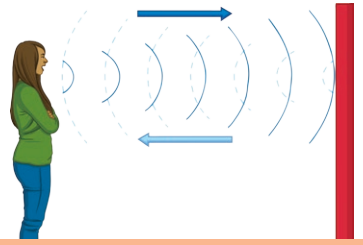

amplitude

without using the words:

1. maximum
2. height
3. wave
4. middle
5. crest

twinkl.com

Describe:

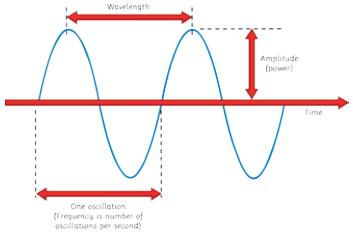

echo

without using the words:

1. sound
2. reflection
3. wave
4. smooth
5. surface

twinkl.com

Describe:

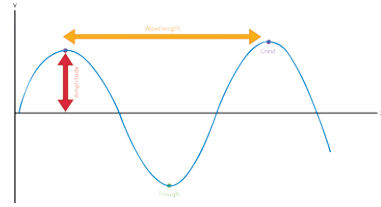

oscillation

without using the words:

1. wave
2. pattern
3. seen
4. screen
5. trace

twinkl.com

Describe:

wavelength

without using the words:

1. length
2. single
3. wave
4. measure
5. crest
