Energy in **Food**

1. What is the name of the chemical reaction which occurs in the body to release stored energy from food? [1]

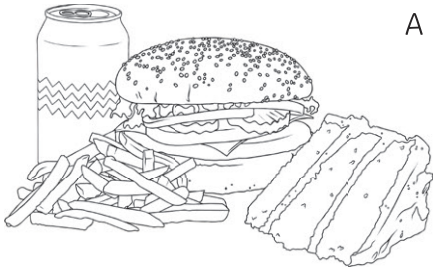

_____

2. How is the energy used in our body? [2]

_____

Look at the three different meals below.

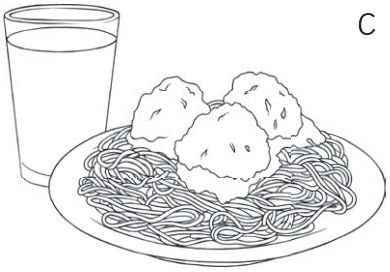

A

B

C

3a. Which is highest in fat? [1] _____

3b. Which is highest in carbohydrate? [1] _____

3c. Which is highest in sugar? [1] _____

3d. Which meal provides the most energy? [1] _____

4. For each person choose the most appropriate intake of energy from the box below. [4]

1500Kcal	2000Kcal	3000Kcal	4000Kcal

I am 10 years old. I like playing outside on my bike a lot.

I work in an office and spend most of my day sitting at a desk.

I work as a bricklayer and labourer on a construction site.

I work as an aerobics instructor and I'm expecting twins!

twinkl.co.uk

Look at the food labels below. They are both from popular drinks.

Milkshake Nutrition

Typical Values	Typical Values per 100ml
Energy	308kJ/73kcal
Fat - of which saturates	1.3g 0.8g
Carbohydrates - of which sugars	11g 10.8g
Protein	4g
Salt	0.2g
Calcium	139mg
Vitamin B12	0.4µg

Sports Drink Nutrition

Typical Values	Typical Values per 100ml
Energy	279kJ/70kcal
Fat - of which saturates	0 0
Carbohydrates - of which sugars	17g 8.7g
Protein	<0.1g
Salt	0.04g

5a. Which drink has the most energy per 100g? [1]

_____

5b. Why are energy values given per 100g? [1]

_____

5c. What does kJ stand for? [1]

_____

Learning Outcomes (tick if achieved)

Q1,2	I can describe how energy is released and used in the body	
Q3	I can identify different food groups	
Q4	I can suggest suitable energy requirements based on lifestyle	
Q5	I can compare nutritional information of foods	

Energy in Food **Answers**

1. What is the name of the chemical reaction which occurs in the body to release stored energy from food? [1]

   Respiration

2. How is the energy used in our body? [2]

   For walking, for moving, in the muscles (accept any answers linked to the seven life processes)

Look at the three different meals below.

3a. Which is highest in fat? [1] **A**

3b. Which is highest in carbohydrate? [1] **A or C**

3c. Which is highest in sugar? [1] **A**

3d. Which meal provides the most energy? [1] **A or C**

Sources of energy come from fats (usually stored for long term release) and from carbohydrates (more readily released)

4. For each person choose the most appropriate intake of energy from the box below. [4]

I am 10 years old. I like playing outside on my bike a lot.

2000Kcal

I work in an office and spend most of my day sitting at a desk.

1500Kcal

I work as a bricklayer and labourer on a construction site.

4000Kcal

I work as an aerobics instructor and I'm expecting twins!

3000Kcal

5a. Which drink has the most energy per 100g? [1]

Milkshake

5b. Why are energy values given per 100g? [1]

Portion / serving sizes may differ, per 100g means the amounts can be compared easily

5c. What does kJ stand for? [1]

kilojoules
