States of Matter **Crossword**

boiling	evaporation	mixture
Brownian motion	freezing	particles
condensation	gas	physical
conservation of mass	hundred	solid
diffusion	liquid	three
energy	melting point	vibrate

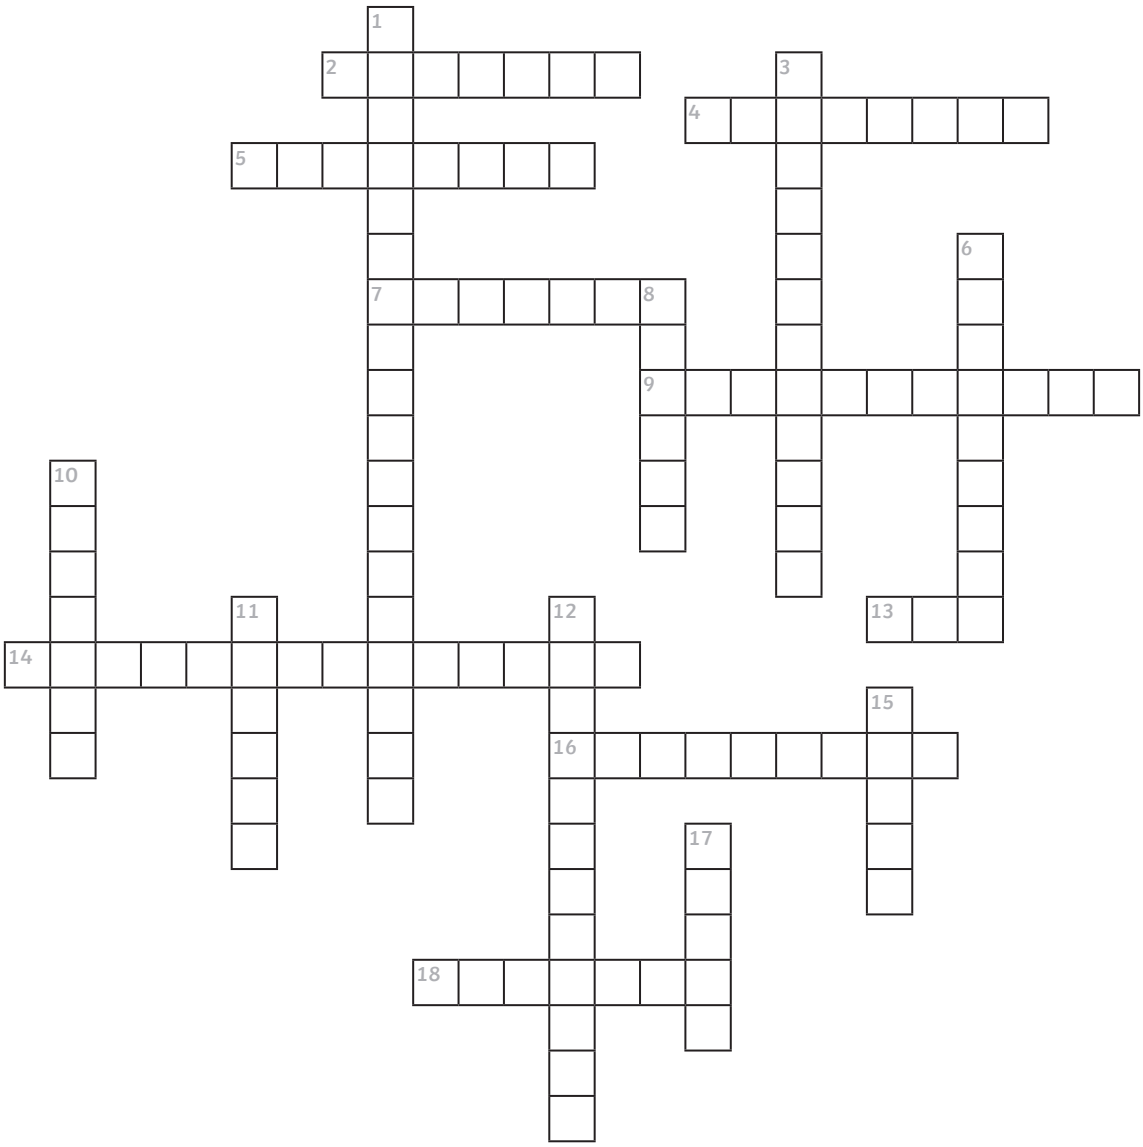

Across

2. When a liquid is heated and gas bubbles rise in the liquid to escape into the air. [7]
4. When the particles in a liquid begin to move more slowly and it turns solid. [8]
5. A usually reversible change in the properties of a substance. [8]
7. A solid begins to melt when the particles begin to _____ faster. [7]
9. The change of state from liquid to gas. [11]
13. State of matter in which the particles are spread out. [3]
14. Random movement of particles in a liquid or gas. [8,6]
16. The movement of particles in a gas or liquid from an area of high concentration to an area of low concentration. [9]
18. Made up of two or more parts, which are not chemically joined together. [7]

Down

1. Scientific law that states the total mass of reactants is equal to the total mass of products. [12,2,4]
3. The temperature at which a substance melts. [7,5]
6. All materials are made up of _____ . [9]
8. Evaporation takes _____ from the surroundings. [6]
10. The boiling point of water in degrees Celsius. [7]
11. State of matter in which particles are arranged close together but can slide over one another. [6]
12. The change of states from gas into liquid. [12]
15. State of matter in which particles are arranged uniformly and in fixed positions. [5]
17. How many states of matter are there? [5]
