Light Waves **Crossword**

absorbed	incident ray	reflection	transparent
density	lens	refraction	transverse
diffuse scattering	opaque	retina	wavelength
dispersed	optical nerve	specular reflection	
emit	prism	translucent	
incidence	reflected ray	transmit	

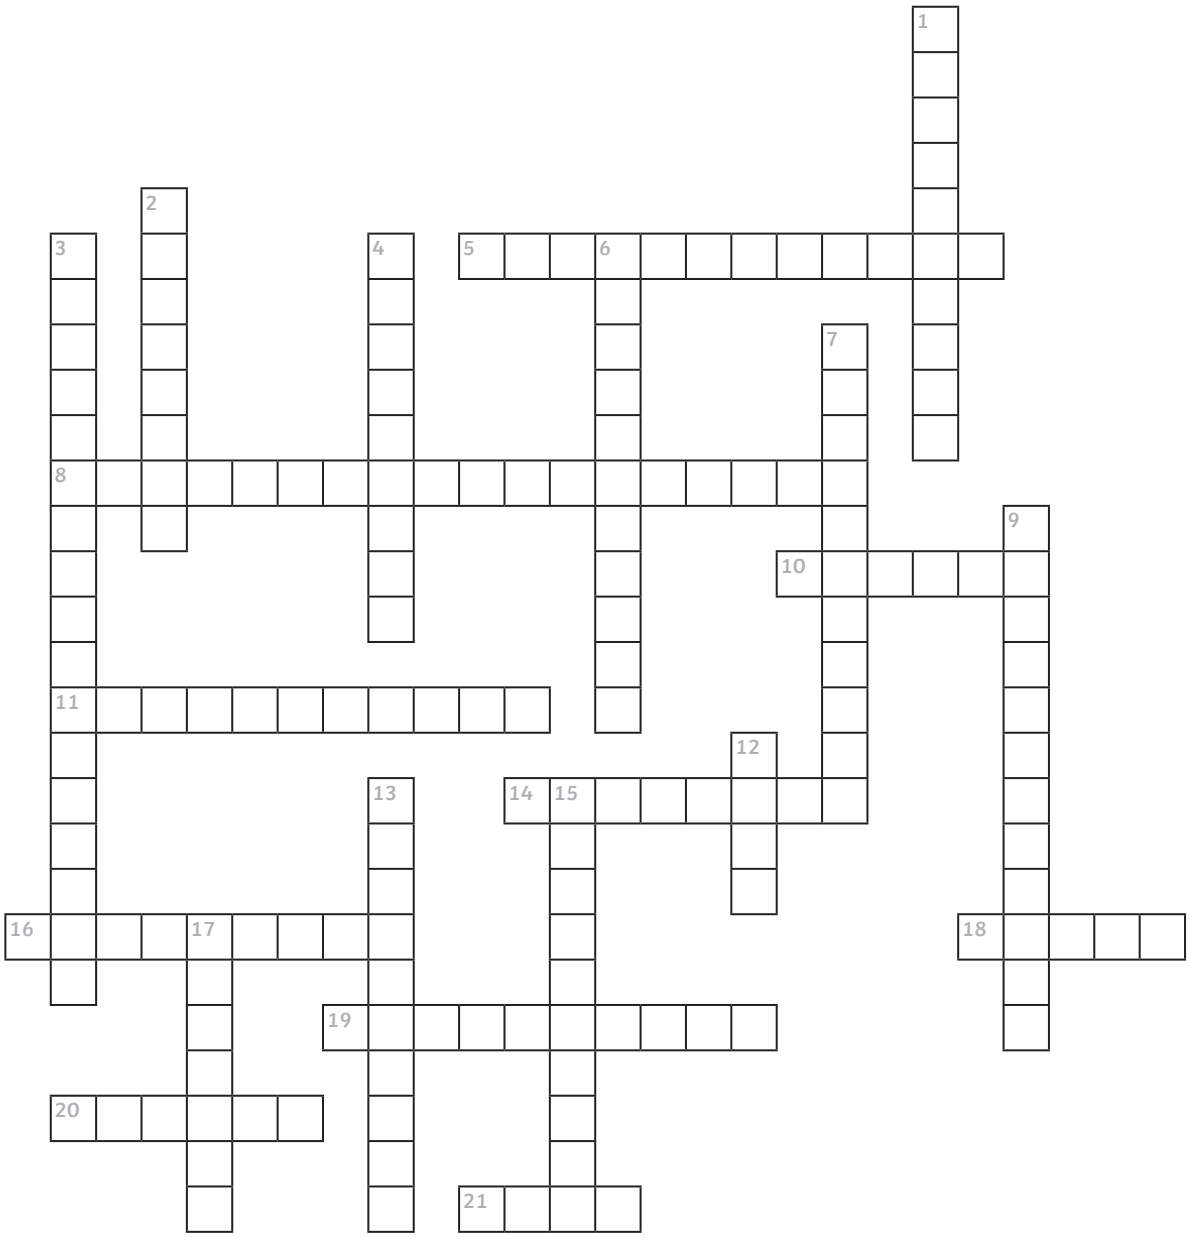

Across

5. Part of the nervous system that transmits messages from the eye to the brain. [7,5]
8. All the light is reflected in one direction (mirror-like). [8,10]
10. Property of a material that stops all light passing through. [6]
11. Property of a material that allows some light to pass through. [11]
14. To allow light to be passed from one place to another. [8]
16. The angle of reflection = the angle of _____ . [9]
18. A shape that has the ability to separatae white light into its different colours. [5]
19. The change in direction of a wave as it moves through a surface at different speeds. [10]
20. Part of the eye that absorbs light. [6]
21. Part of the eye that focuses the light. [4]

Down

1. A type of wave where the energy is transferred at a right angle to the direction that the wave is travelling. [10]
2. When the wave energy is taken in. [8]
3. Behaviour of a wave when it is reflected in many directions. [7,10]
4. When the parts of a spectrum are separated into their individual wavelengths. [9]
6. The light ray that travels towards a surface. [8,3]
7. Property of a material that allows all light to pass through. [11]
9. The light way that bounces back off the surface. [9,3]
12. To give out light. [4]
13. The distance between two identical points on a wave. [10]
15. When a wave bounces off a surface. [10]
17. How much 'stuff' there is in a given space. [7]
