properties	At this point, a substance changes from a liquid to a gas.
boiling point	We use this method to separate substances dissolved in a liquid, e.g. ink.
chromatography	The process of a liquid changing into a gas.
evaporation	Passing a mixture through special paper in a funnel to separate it.

twinkl.co.uk

filtering	The soluble part of a mixture that filters through the paper.
filtrate	The insoluble substance that stays in the filter paper.
residue	This method is used to separate crude oil into fractions.
fractional distillation	A substance that does not dissolve in a particular solvent.

twinkl.co.uk

insoluble	The name of a mixture of a solvent and a solute.

twinkl.co.uk

solution	The liquid part of a solution.

twinkl.co.uk

solvent	The solid part of a solution.

twinkl.co.uk

solute	Two or more substances that can be separated easily.

twinkl.co.uk

mixture	A substance that will dissolve in a particular solvent.
soluble	Used in a funnel to separate filtrate from residue in filtration.
filter paper	The state of matter in which atoms move over each other but are still touching.
liquid	This piece of apparatus is used to heat substances.

twinkl.co.uk

Bunsen burner	This method of separation separates solutions and solvents.
simple distillation	The boiling point of pure water.
100°C	This is also called alcohol and is produced by fermentation.
ethanol	The boiling point of pure ethanol.

twinkl.co.uk

78°C	In chromatography, a line is drawn in this so as not to interfere with the ink.
pencil	This is produced when a chromatography experiment has been carried out.
chromatogram	Particles moving from an area of high concentration to an area of low concentration.
diffusion	A substance with nothing added to it- contains one element or compound.

twinkl.co.uk

pure	A solute mixing into a solvent to create a solution.

twinkl.co.uk

dissolving	Two or more elements chemically joined together.

twinkl.co.uk

compound	The product of heating iron and sulphur.

twinkl.co.uk

iron sulphide	These are changed if a chemical reaction happens between two substances.
