Types of Energy Carousel Investigation

Aim: to be able to identify and draw a diagram to represent energy transfer.

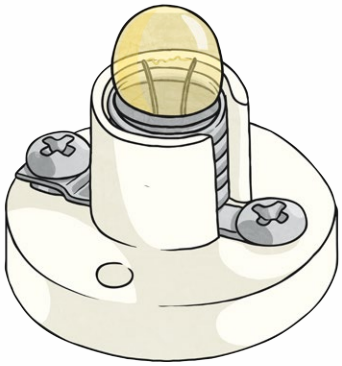

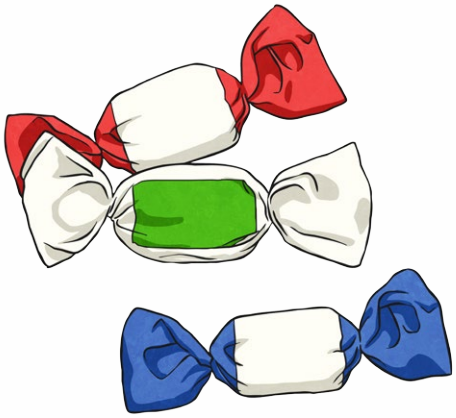

Equipment:

- Pencil
- Ruler
- Different objects including: wind-up toy, solar calculator, hairdryer, filament bulb (e.g. ray box), packet of sweets (your teacher will set this up at stations around the lab for you to investigate).

Observe and discuss with a partner the energy and energy transfers in each object. After you have identified the energy transfers occurring, draw an energy transfer diagram to represent them in the box.

Wind up the toy and observe 	
How does the calculator work? 	

visit twinkl.com

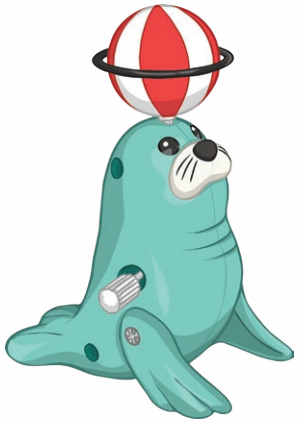

Switch on the hairdryer 	
What is the purpose of a bulb? 	
Eat a sweet. Why do our bodies need food?
