Student Revision Checklist

Chemical Reactions

For your revision, make sure that you are comfortable with each of the following areas of knowledge.

Differentiate between a chemical and physical change.			
Describe what happens in chemical reactions.			
Explain the role of a catalyst in a chemical reaction.			
Identify the products and reactants in a chemical reaction.			
Write word equations for chemical reactions.			
State the meaning of the word fuel.			
State another word for burning.			
Write an equation for the burning of a fuel.			
Explain what is meant by thermal decomposition.			
Name the products of the thermal decomposition of Calcium carbonate.			
State how to test for the presence of carbon dioxide, hydrogen and oxygen.			
Explain the term 'conservation of mass'.			
State the signs of an exothermic reaction and give an example.			
State the signs of an endothermic reaction and give an example.
