Student Revision Checklist

The Periodic Table

For your revision, make sure that you are comfortable with each of the following areas of knowledge.

Show where metals and non-metals would be found on the periodic table.			
Name the properties of a typical metal.			
Explain how Dmitri Mendeleev organised the periodic table.			
Name the element, if provided with the group number and period number.			
Name three metals found in group 1.			
List the properties of group 1 metals.			
Write an equation for the reaction between group 1 metals and water.			
Name three elements found in group 7.			
List the properties of group 7 elements.			
Explain what happens in a displacement reaction.			
Describe the physical and chemical properties of the noble gases.			
Give a use of neon, helium and argon.
