Student Revision Checklist

Forces

For your revision, make sure that you are comfortable with each of the following areas of knowledge.

List three things forces can do.			
Name the piece of equipment to measure a force and its unit.			
Describe what is meant by an interaction pair.			
Use Hooke's law to explain what happens when a spring is stretched.			
State two things that friction does to an abject.			
State one way to help overcome friction.			
Name the two drag forces.			
Describe what is meant by a force field.			
Explain the difference between mass and weight and state their units.			
Describe the difference between balanced and unbalanced forces.			
Label force diagrams, using arrows.			
State the two things that arrows show on a force diagram.			
Explain how unbalanced forces can result in a change of speed or direction.			
Provide examples of contact forces.			
Provide examples of non-contact forces.
