Finger Joints Paper Model

1. Print onto card.
2. Cut along the solid lines.
3. Fold along the dotted lines.
4. Glue the yellow areas.
5. Thread strong string through the hole and down the model.

Finger Joints Paper Model

What you need:

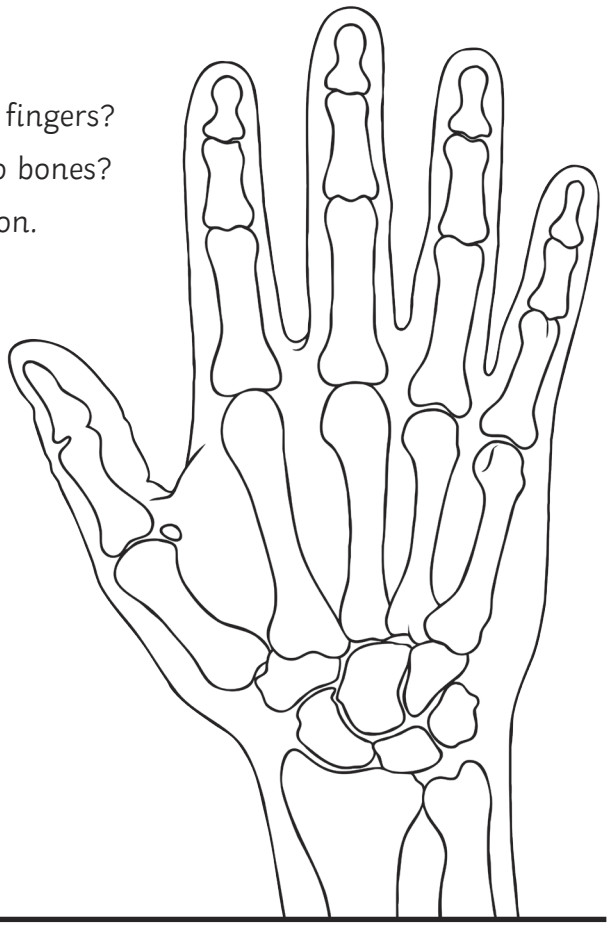

- Finger joints paper template (works fine with paper but you may want to print onto card for extra rigidity);
- length of string (about 30-40cm);
- scissors;
- glue;
- staple, sticky tape or paperclip (optional).

Instructions for making your model

1. Cut along the solid black lines
2. Mountain fold along the dotted lines
3. Glue the yellow shaded parts, overlapping completely with the opposite side
4. Pierce a hole on the small dot.
5. Thread a piece of string through the hole and tie a knot on the picture side (you may need to secure with sticky tape, a paperclip or a staple).
6. Thread the string through the centre of the model, along the whole length.
7. Hold your paper model carefully then pull the loose end of the string downward. Watch what happens to the finger!

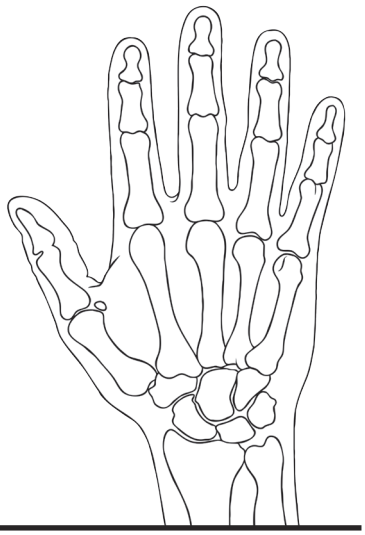

Questions

1. What are the different bones called which make up your fingers?
2. What is the name of the tissue which connects muscle to bones?
3. Describe how the muscles create movement in the skeleton.
4. How does a joint allow movement?
5. What type of joint is your model an example of?

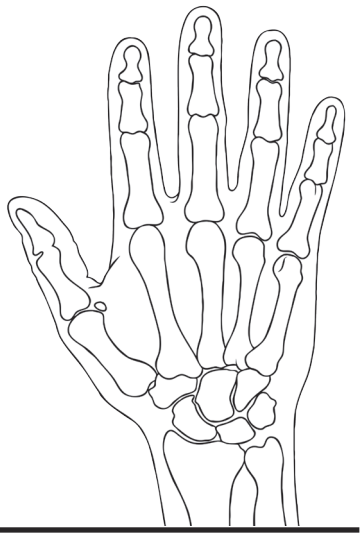

Finger Joints Paper Model **Answers**

1. (Carpals), metacarpals and phalanges
2. Tendon
3. Muscles contract and relax which changes their length and pulls on the skeleton to move it.
4. Allows the skeleton to bend or rotate in certain positions.
5. Hinge joint
