Naming molecules

Molecules of a compound or element can be represented in diagrams. Below are two common molecules.

water

sulfur dioxide

☞ **1** Match the names and formula to the correct diagrams using the key below.

Key

carbon

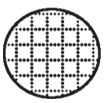

nitrogen

magnesium

oxygen

zinc

sodium

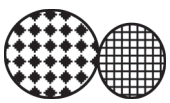

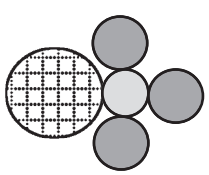

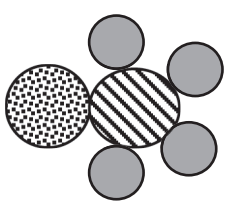

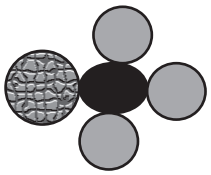

sulfur

chlorine

potassium

Name	Formula	Molecular diagram
sodium nitrate	$ZnCO_3$	
magnesium sulphate	KCl	
potassium chloride	$NaNO_3$	
nitrogen dioxide	$MgSO_4$	
zinc carbonate	NO_2
