# Properties of different metals

Different metals have different properties that make them useful for different jobs.

☞ **1** Fill in the missing vowels (a, e, i, o, u) to complete the information in the table.

| Metal | Properties | Uses |
|---|---|---|
| al __ m __ n __ __ m | s __ ft, l __ ght, resists<br>c __ rr __ si __ n, good<br>el __ ctr __ c __ l conductor | s __ ft dr __ nk cans,<br>w __ nd __ w<br>frames, __ __ rcraft |
| c __ pp __ r | g __ __ d cond __ ct __ r of<br>h __ __ t and electricity,<br>d __ ct __ le, r __ sts slowly | w __ t __ r pipes and t __ nks,<br>electr __ c __ l w __ ring |
| g __ ld | s__ft, d__nse, m__ ll__ __ble,<br>resists corrosion, has l__str__ | j __ w __ ll __ ry |
| __ r __ n | hard, br __ ttle, r__sts easily,<br>m __ gn__tic | used to make st __ __ l,<br>br __ dg __ s |

**2** What metal am I?

**a** I am a light metal which does not corrode easily. I can be found in aeroplanes and window frames. I am _____.

**b** I am a hard metal often used in buildings. I rust easily, so you can often find me mixed with other metals and non-metals to slow down rusting. I am _____.

**c** I am a shiny and soft metal. I am very valuable and used for jewellery and crowns. I am _____.

**d** I am an excellent conductor of electricity, so I am often used in electrical wiring. You will often find hot water tanks made out of me because I resist corrosion. I am _____.
