HANDLING LIQUIDS

6

Many different items of glassware are used when handling liquids. Below are diagrams (not to scale), names and uses of glassware. Cut out each box and match each name and use to the correct diagram.

1 	2 	3 	4 
5 	6 	7 	8 
9 	**Dropper**	**Stirring rod**	**Conical flask**
	Test tube	**Volumetric flask**	**Burette**
	Pipette	**Funnel**	**Measuring cylinder**
	Beaker	**A** Stirs liquids.	**B** Delivers variable volumes very precisely by means of a tap
10 	**C** Delivers a fixed amount of liquid	**D** Can swirl contents without loss	**E** Helps to pour liquids into containers
	F Delivers drops	**G** Makes standard solutions	**H** Used for small-scale reactions
	I Can measure variable volumes accurately	**J** Used for transporting liquid; gives approximate volumes
