Parents and Offspring

54

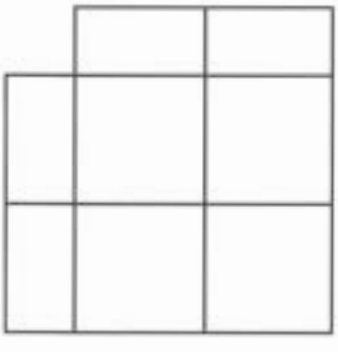

The diagram above shows a cross between two 'true breeding' parents.

1. From the diagram, which parent is homozygous dominant? _____
2. Which parent is homozygous recessive? _____
3. The offspring's genotype would be referred to as what? _____
4. Is there any other outcome possible for the offspring? Explain your answer. _____

_____

_____

5. If the offspring is back-crossed with parent 1, work out (using a Punnett square) the possible outcomes. Include descriptions of the resulting phenotypes.

_____

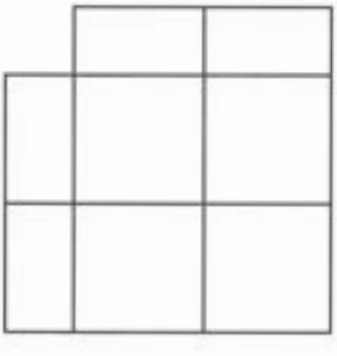

_____

_____

_____

_____

6. If the offspring is back-crossed with parent 2, work out (using a Punnett square) the possible outcomes. Include descriptions of the resulting phenotypes.

_____

_____

_____

7. Explain why the two back crosses in Questions 6 and 7 produced different outcomes.

_____

_____

_____

_____
