Cheminoes – compounds 23

Below is a domino game about the chemical and common names of compounds.

Instructions:

- Cut out the chemino pieces by cutting along the thick lines.
- Place them face down on the table.
- Divide the pieces between each of two to four players.
- One piece is placed face up in the middle of the table. Each player in turn joins one piece onto either end of the pieces on the table, making a long chain. The chemino pieces show the chemical symbol and its common name. The symbol is to be matched with its common name.
- The first person to use all their pieces is the winner.

The following table will help you to translate the symbol into its common name.
