Cheminoes – elements and compounds 21

Below is a domino game with the names and symbols of common elements and compounds.

Instructions:

- Cut out the chemino pieces by cutting along the thick lines.
- Place them face down on the table.
- Divide the pieces between each of two to four players.
- One piece is placed face up in the middle of the table. Each player in turn joins one piece onto either end of the pieces on the table, making a long chain. The symbol and name of the same substance are to be matched.
- The first person to use all their pieces is the winner.
