Where do I fit in my family tree?

Pedigrees or family trees are useful tools for showing patterns of **inheritance** across a family. Pedigrees use symbols and shadings to communicate information. Some of the symbols used are shown below.

1 Look at the pedigree at the right.

a How many females are there?_____

b How many males are there?_____

c How many grandchildren are there?_____

d Are there any twins in the family?_____

e What is the relationship between individuals 7 and 8?_____

f What is the relationship between individuals 5 and 10?

_____

g What is the relationship of individuals 3 and 4 to individual 11?

_____

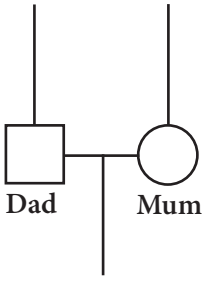

h All females have the feature of brown eyes. Show that in the pedigree.

2 Use the starter pedigree below to draw your own family tree.
Tips for what to include at each level are listed at the left. Make sure you use the correct symbols.

Great-grandparents

Grandparents

Parents, aunts, uncles

Sisters, brothers, cousins

Me

Nieces, nephews

3 Choose a feature that runs in the family, like tongue rolling or a widow's peak. Shade the people in your family tree that have this feature.
