Activity

Complete the beginning of each statement using the keywords. Use each keyword at least once.

pure substances	atoms	molecules	elements	compounds	mixtures

Statements

1	be broken down into something simpler.
2	two or more elements or compounds mixed, but not combined, together.
3	made when atoms join together in a group.
4	made when two or more elements have combined.
5	made from only one type of atom.
6	be separated into pure substances.
7	made from atoms or molecules all of the same type.
8	the smallest amounts of an element that can take part in a chemical reaction.

Teaching notes

Students could complete the statements on the sheet or they could be asked to write out the whole sentences.

To extend the activity students could then be asked to use a different keyword to complete each of the statements.

Suggested answers

1	**Molecules can** be broken down into something simpler.
2	**Mixtures comprise** two or more elements or compounds mixed, but not combined, together.
3	**Molecules are** made when atoms join together in a group.
4	**Compounds are** made when two or more elements have combined.
5	**Elements are** made from only one type of atom.
6	**Mixtures can** be separated into pure substances.
7	**Pure substances are** made from atoms or molecules all of the same type.
8	**Atoms are** the smallest amounts of an element that can take part in a chemical reaction.
