Task 1

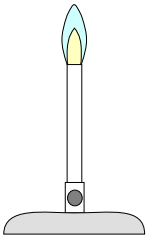

Label the following pieces of laboratory equipment

1. .....

2. .....

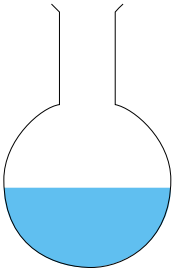

3. .....

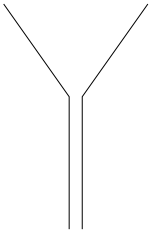

4. .....

5. .....

6. .....

7. .....

8. .....

9. .....

Draw diagrams below for an evaporating basin and a pestle and mortar.

Task 2

Which items of laboratory equipment would you use in the following situations?

1. Heating a small quantity of a solid chemical.

   .....

2. Heating a small quantity of a liquid chemical.

   .....

3. Grinding lumps of rock salt into a powder.

   .....

4. Filtering dirty water.

   .....

5. Mixing two liquids by gently shaking.

   .....

6. Heating a 250cm^3 of a solution to boiling point.

   .....

7. Obtaining salt from a salt solution by heating strongly.

   .....

8. Measuring the boiling point of water.

   .....

9. Dissolving salt in water by stirring.

   .....

10. Heating a small sheet of copper metal.

    .....

Answers

Task 1

1. Beaker	2. Conical flask	3. Bunsen burner
4. Thermometer	5. Tripod and gauze	6. Round bottomed flask
7. Filter funnel	8. Boiling tube	9. Test tube

Draw diagrams below for an evaporating basin and a pestle and mortar.

Task 2

1. NB Safety glasses are needed in all of the following situations.
2. Bunsen burner, test tube, test tube holder, safety mat
3. Bunsen burner, boiling tube, test tube holder, safety mat
4. Pestle and mortar
5. Filter funnel, filter paper, beaker or conical flask to collect liquid, clamp stand to support filter funnel
6. Conical flask
7. Round bottomed flask or beaker
8. Evaporating basin, Bunsen burner, tripod and gauze, safety mat
9. Thermometer
10. Beaker and stirring rod
11. Bunsen burner, tongs, safety mat
