Define eukaryotic cell & give an example	**Forfeit** Do the action song 'Head, shoulders, knees and toes' backwards	Define eukaryotic cell & give an example	**Forfeit** Say 'red lorry, yellow lorry' 5 times
Define prokaryotic cell & give an example	**Forfeit** Stand on one leg for a minute	Define diffusion and give an example of diffusion in humans	**Forfeit** Sing a Christmas song
Name 3 cell organelles and give functions of each	**Forfeit** Impersonate a frog	Name the pores on the underside of a leaf	**Forfeit** With members of your team make a table and chair
Name two specialised cells and give adaptations of both	**Forfeit** Sing the song 'I'm a little teapot' with actions	Explain how temperature affects diffusion	**Forfeit** Impersonate a chicken
Name the two human gametes	**Forfeit** Count backwards from 50 to 0, in fours	Describe where and how osmosis occurs in plants	**Forfeit** Mime baking a cake
Define the term allele	**Forfeit** Pose like a model doing catwalk	Define partially permeable membrane	**Forfeit** Talk for 30 seconds about tortoises
What is the purpose of mitosis?	**Forfeit** Give todays weather forecast for the UK	Describe two ways lungs are adapted for gas exchange	**Forfeit** Do the YMCA actions
Describe the differences between light microscopy and electron microscopy	**Forfeit** Mime riding a bike	Describe the 3 stages of the cell cycle	**Forfeit** Say the alphabet backwards
What are stem cells and where are they found in plants and animals?	**Forfeit** Do a 30 second pitch for a brick to the dragons	Describe active transport	**Forfeit** Dance like a ballet dancer
What factors affect the rate of diffusion?	**Forfeit** Interview a person on your team about their hobby	How can stem cells from plants be used?	**Forfeit** Talk for 30 seconds about goldfish

Teaching notes

Before the lesson copy the cards and cut them up, so that each card has a question and a forfeit on it.

Equipment per team (team size 3-4 students)

- 10 question/forfeit cards
- 10 paper cups
- 1 ping pong ball

Ask each team to arrange their cups facing each other as below:

- Put a ‘question-forfeit’ card in each cup.
- The teams then take it in turns to throw a ping pong ball into their opponents’ cups.
- When a ball lands in a cup, the throwing team answers the question in the cup.
- If they can’t answer the question correctly, they must do the forfeit. The cup is then taken away.
- If they answer the question correctly the team scores 4 points. If they do the forfeit they score 2 points. If they fail to do either the other team gains 3 points.
- The game ends when a team has had all its cups removed.
- The winning team is the team with most points.
- As a follow up, ask students to keep the questions that they couldn’t answer in a pile. They then need to use their notes to find the correct answers. Build up a definitive set of answers as a class.
