

Across

2. The number of waves that pass a certain point every second.

4. Sound waves with frequencies below the range of human hearing.

5. The unit that frequency is measured in.

7. Vibration.

8. All waves carry this.

9. A vacuum is a space without any

13. High pressure part of a longitudinal wave.

Down

1. A sound waves with a frequency higher than can be heard by a human.

3. The amount of energy carried by a wave.

6. Distance from the crest of one wave to the crest of another.

10. High frequency sounds waves produce high _____ sounds.

11. Technology that uses sound waves underwater to find fish.

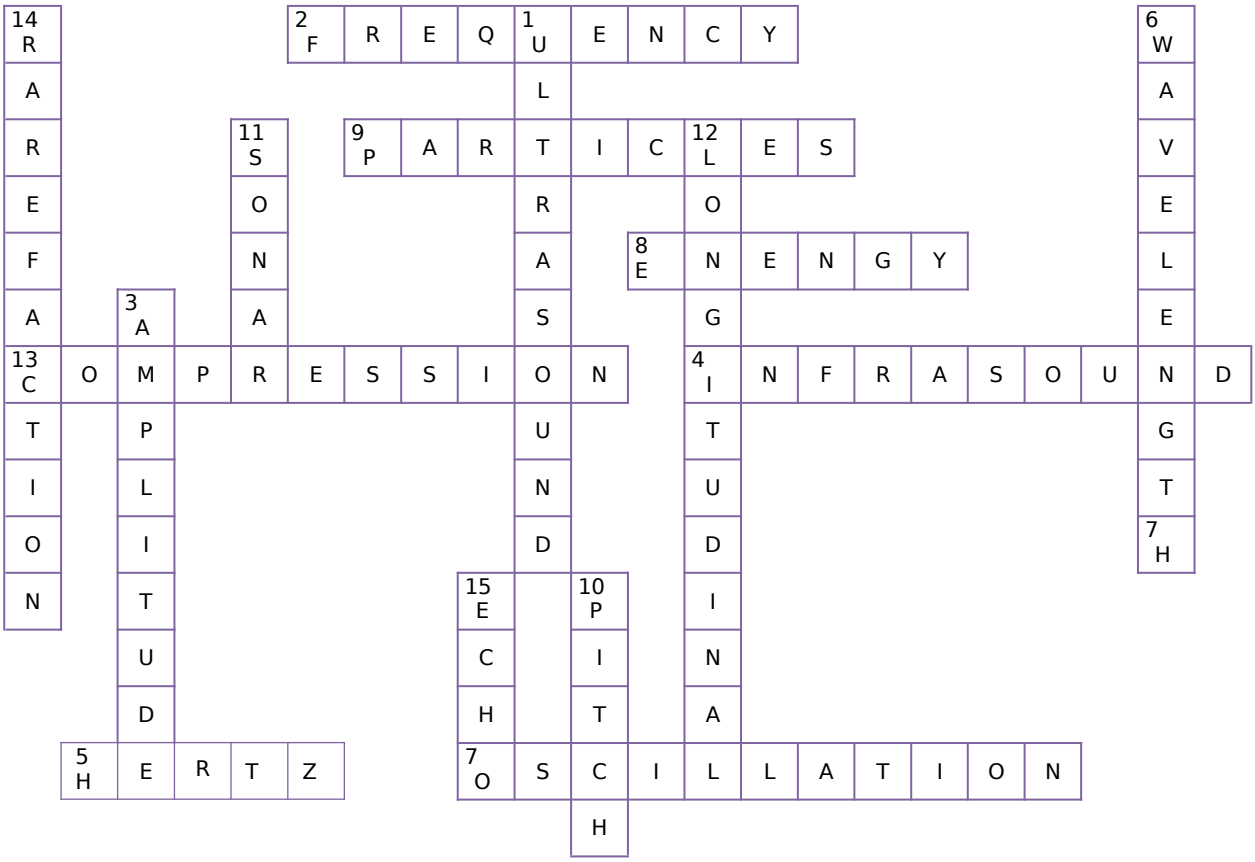

12. Sound is this type of wave.

14. Low pressure part of a longitudinal wave.

15. Reflected sound wave.
