Instructions

The numbered answers do not match the lettered clues. Can you sort them out? A grid has been provided to help you. Simply write the correct numbered answer under each lettered clue. The first has been done for you.

a.	One of the ways substances move into and out of cells.
b.	In animals this system produces sperm and eggs.
c.	This plant cell is specialised to absorb water.
d.	This system uses your heart, lungs and blood vessels to transport substances around your body.
e.	This system protects your body from infections.
f.	This plant cell is specialized to carry out photosynthesis.
g.	The special features used to help a cell carry out its specialised function are called this.
h.	Found only in plant cells. It absorbs energy from sunlight so that the plant can make food.
i.	A living thing made up of many types of cell is...
j.	A grouping of different tissues working as a team to perform a function.
k.	Living things made up of one cell.
l.	This encloses the cell and controls the movement of substances coming in and going out.
m.	This system breaks down and absorbs the food that you eat.
n.	A specialised animal cell, which is biconcave, has no nucleus and is used to absorb oxygen.

1.	Cell
2.	Cell membrane
3.	Cell wall
4.	Chloroplast
5.	Ciliated cells
6.	Circulatory system
7.	Cytoplasm
8.	Diffusion
9.	Digestive system
10.	Immune system
11.	Mitochondria
12.	Multi-cellular
13.	Musculoskeletal system
14.	Nucleus

o.	A specialised animal cell, which has a tail and can fertilise egg cells.
p.	These specialised cells remove bacteria from your respiratory system.
q.	An egg cell found in both plants and animals.
r.	Oval structures found within the cytoplasm of all cells. They **release** energy from food.
s.	A grouping of one type of cell.
t.	In plant cells this is made of cellulose.
u.	This system supplies you with fresh oxygen and removes carbon dioxide.
v.	The part of a cell that contains its DNA.
w.	The most basic unit of all living organisms.
x.	Large area in plant cells. Used to store sugars and salts.
y.	This system promotes movement and supports the body.
z.	The fluid inside all cells where respiration occurs.

15.	Organ
16.	Ovum
17.	Palisade cells
18.	Red blood cell
19.	Reproductive
20.	Respiratory
21.	Root hair cell
22.	Sperm cell
23.	Structural adaptations
24.	Tissue
25.	Unicellular
26.	Vacuole
