Worksheet 9.5

The rock cycle

Answers

1. Label the rock cycle diagram using four of the terms from the list.

remelting	sedimentary rock	weathering and erosion	igneous rock	metamorphic rock

2. The three types of rocks illustrated in the rock cycle have particular uses in our society. Complete the table by classifying each rock into its group (sedimentary, igneous, metamorphic) and stating a common use of each rock.

Rock	Classification group	Use in society
Slate	Metamorphic	Roofing, garden walls
Sandstone	Sedimentary	Building, decorative walls
Basalt	Igneous	Blue metal in concrete

3. Metamorphism due to heat or pressure can change a sedimentary rock into a metamorphic rock. Complete the diagram by inserting the names of pairs of rocks from the list.

quartzite	limestone	marble	shale	sandstone	slate
