Worksheet 11.5

Forensics: Summary

Answers

Fill in the gaps.

1. evidence: anything that assists with a conclusion or judgement — that is, a testimony or material sample
2. accelerant: a substance, such as petrol, that is used to start a fire or explosion
3. database: an organised collection of data, arranged for easy and speedy retrieval
4. analyse: examine closely to answer a question or solve a problem
5. psychology: the science of mental processes, particularly emotional and behavioural characteristics. Practitioners are not medically trained and do not prescribe medicine.
6. Botanist: a scientist who studies the life of plants
7. Whorl: a circular type of fingerprint pattern
8. Cuticle: the scaly outer covering of a hair
9. Magnifying glass: a convex lens used to enlarge an object
10. Administration: the management of an organisation, business or task to meet certain goals
11. Psychiatrist: a medically trained doctor who studies the mental condition and behaviour of patients
12. Pollen: a fine coarse powder produced by seed plants
13. Comparison microscope: a microscope that allows two objects to be viewed at the same time so they can be compared
14. Liability: an obligation, responsibility, hindrance or something that causes a disadvantage

Write definitions for the following terms.

1. civil court: a law court that hears legal matters, usually minor, and not relating to a criminal investigation — for example, child custody battles.
2. fibres: fine threads that make up fabric and paper
3. entomologist: a scientist who studies insects
4. counterfeit: an imitation or copy that is made to deliberately deceive; for example, counterfeit money
5. trace evidence the tiny evidence found at crime scenes — includes hair, fibres and soil

Write a question for which the following words are the answer.

1. synchrotron

   What machine accelerates electrons to almost the speed of light and deflects them through magnetic fields so the electrons create an extremely bright light?

2. anthropologist

   What type of scientist studies humans — their origin and behaviour — as well as their physical, social and cultural developments?

3. pathologist

© John Wiley & Sons Australia, Ltd

What type of doctor specialises in interpreting test results and physical evidence found in samples analysed in medical laboratories, in relation to the causes of disease and other illness?

4. biased

What do we call a person who has a preference or inclination for a particular line of reasoning?
