Worksheet 3.7

Summing up

Answers

Complete the statements below to compile a summary of this unit. The missing words can be found in the word list below.

1. If viruses are assumed to be non-living, all living things are made up of ..cells.....
2. ..Microscopes..... are used in the observation and investigation of cells.
3. When you use a ...monocular..... light microscope, you use only one eye, whereas you use two eyes with a .....stereo..... microscope.
4. .....Light..... microscopes allow you to look at living specimens, whereas ..electron..... microscopes do not.
5. When you look down the microscope and move the slide to the right, what you see moves to the ....left.....
6. Both plant and animal cells usually contain a nucleus and ....cytoplasm.....
7. Plant cells sometimes also contain a ...vacuole..... and .....chloroplasts.....
8. The .....nucleus..... is the control centre of the cell; it keeps the cell alive and working properly.
9. Eukaryotic cells have a membrane around their nucleus, whereas .....prokaryotic..... cells do not.
10. Of the five kingdoms .....Animalia....., ...Fungi....., Plantae and .....Protoctista..... have eukaryotic cells.
11. The .....size..... and .....shape..... of cells may differ depending on their function.
12. Although viruses do not have true cells, they do contain .....nucleic acid.....

nucleic acid	stereo	size
light	electron	Animalia
nucleus	cells	cytoplasm
prokaryotic	monocular	chloroplasts
Fungi	left	vacuole
microscopes	shape	Protoctista
