Worksheet 6.3

Science Quest 9: pages 242–5

Top ten elements

Answers

The non-metals are listed in the top right-hand corner of the periodic table. On the periodic table, the non-metals make up only about one quarter of the elements. But on Earth, the non-metals make up the majority (about three-quarters) of substances.

Use the following table to list the ten most abundant elements found on Earth. The two most abundant elements are non-metals. Use a periodic table to fill in the missing spaces.

Element	Symbol	Atomic number	Number of neutrons	Abundance in the Earth's crust (%)
Oxygen	$^{16}_{8}O$	8	8	46.1%
Silicon	$^{28}_{14}Si$	14	14	28.2%
Aluminium	$^{27}_{13}Al$	13	14	8.3%
Iron	$^{56}_{26}Fe$	26	30	5.6%
Calcium	$^{40}_{20}Ca$	20	20	4.2%
Sodium	$^{23}_{11}Na$	11	12	2.4%
Magnesium	$^{24}_{12}Mg$	12	12	2.3%
Potassium	$^{39}_{19}K$	19	20	2.1%
Titanium	$^{47}_{22}Ti$	22	25	0.6%
Hydrogen	$^{1}_{1}H$	1	0	0.1%
