Worksheet 2.9

Getting into genes: Puzzle

Answers

Across

2. Division that produces gametes
4. Observable characteristic of an organism
6. Cells containing pairs of chromosomes
8. A gene that needs only one copy to be expressed
12. A different form of a gene
13. Two copies of the same allele
16. Present in a base
18. Male
19. One copy of each chromosome
21. Backbone molecule
23. Pairs with cytosine

Down

1. Genetically identical to the parent
2. DNA change
3. Genetic makeup of an individual
4. Genetic square to predict outcomes of crosses
5. Pairs with thymine
7. One of each type of allele is present
9. Chromosomes found here
10. A gene that needs two copies to be expressed
11. Sorting chromosomes
14. Cell division producing identical cells
15. Genetic material
17. Sex cell
20. Genetic syndrome
22. Inherited characteristic
