YEAR 9 SCIENCE
CHEMICAL SCIENCES
WORKSHEET - ACIDS, BASES AND SALTS

1. Determine whether the following substances are ***ACID (A), BASE (B) or SALT (S)***. Write the appropriate letter next to the substance.

(a)	NaCl	(b)	MgO	(c)	zinc hydroxide	(d)	HNO_3
(e)	copper sulphate	(f)	copper oxide	(g)	$Al_2(SO_4)_3$	(h)	H_2SO_4
(i)	NaOH	(j)	HCl	(k)	$FeCl_3$	(l)	$Ca(NO_3)_2$
(m)	sodium oxide	(n)	CH_3COOH	(o)	potassium acetate		

2. Complete the following general word equations for acid reactions.

ACID + METAL _____ + _____

ACID + BASE _____ + _____

ACID + CARBONATE _____ + _____

+ _____

3. For the following acid reactions, ***complete the word equations***. Use the general equations in Q2 above to help you.

(a) magnesium oxide + sulphuric acid

(b) aluminium + hydrochloric acid

(c) sodium carbonate + sulphuric acid

(d) potassium hydroxide + nitric acid

(e) calcium + acetic acid

(f) copper oxide + acetic acid

(g) iron carbonate + hydrochloric acid

(h) zinc + sulphuric acid

(i) calcium carbonate + nitric acid
