code of behaviour for science students

This code of behaviour has the support of the majority of science teachers in Western Australia and the National Safety Council of Western Australia. It describes how you are expected to behave during science lessons. It will help you keep your room and you safe.

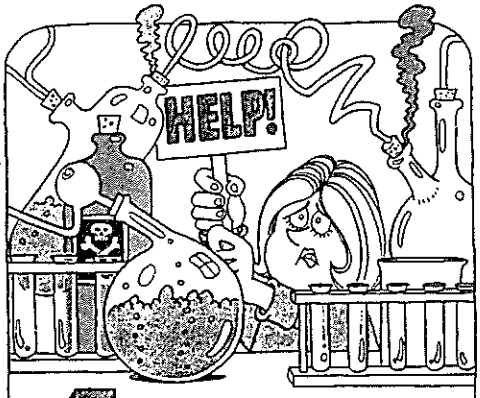

1 Be invited into the laboratory.
Don't invite yourself.

2 Be aware of safety stations, Evacuation procedures and First Aid posts.

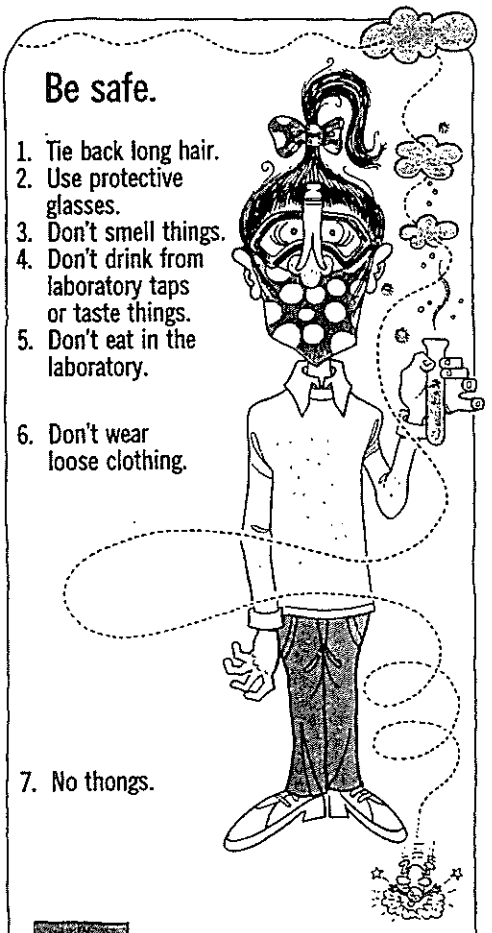

3 Be sensible about behaviour.
No running or fooling about.
No unauthorised experiments.
Stop and listen if asked.

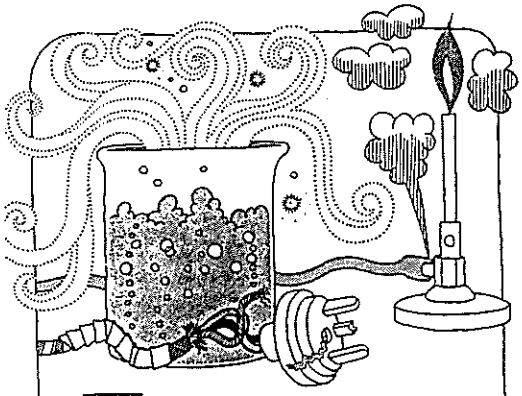

4 Be supportive of other students and your teacher.
Help others to act safely.

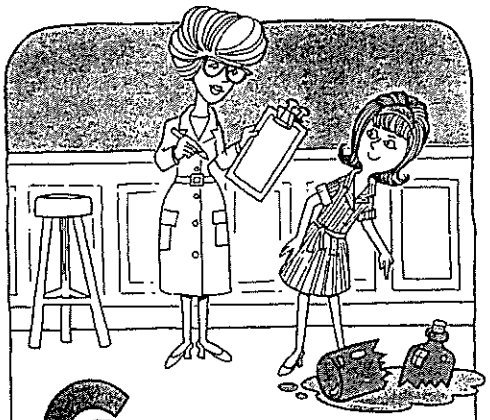

Be safe.

1. Tie back long hair.
2. Use protective glasses.
3. Don't smell things.
4. Don't drink from laboratory taps or taste things.
5. Don't eat in the laboratory.
6. Don't wear loose clothing.
7. No thongs.

5 Beware of broken power outlets, leaking gas, flammable liquids, hot glass.
Report all damage.

6 Be responsible in reporting breakages to let your teacher know what to replace.

7
8. Put bags away.
9. Don't leave burners alight.
10. Don't store hot equipment.
11. Don't mix chemicals randomly.

8 Take care of equipment.
Use only as instructed.

9 Be kind to laboratory organisms.

10 Be clean and tidy.
Clean away equipment, wipe up spillage, disinfect.
Wash hands if told to.

CURRICULUM BRANCH—EDUCATION DEPARTMENT OF WESTERN AUSTRALIA: SAFETY IN SCIENCE

30263/11/83—1M PADS—I /3312

SAFETY RULES I WILL FOLLOW

I should obtain permission before:

* entering a L _____
* Using materials or E _____

When working, I should remember to:

* keep benches and working areas tidy and C _____
* keep in their correct places all equipment and G _____
* keep floors clear of unnecessary objects, such as stools, files and books; always move them away from the working area.
* Report to my teacher any spillages or damaged E _____
* Carefully follow all I _____

For protection, I should:

* find out how to use a new piece of equipment before trying it.
* move carefully, as sudden movement can cause A _____
* wear sensible clothing and foot W _____
* when necessary tie back long hair and wear S _____
* before returning, all glass ware should be C _____
* never eat in the laboratory nor drink from G _____

In an emergency I will:

* report all A _____
* know where to find and how to use the fire E _____
* know where the first aid kit is kept.
* clean up spilt C _____
* dispose of solids and liquids that are H _____
* treat minor injuries such as splashes from chemicals and scratches from broken G _____

REMEMBER - THE MOST COMMON ACCIDENTS IN A LABORATORY ARE:

* **Cuts from broken glass.**
* **Splashes and burns from chemicals.**
* **Burns from hot equipment.**

SAFETY PROJECT

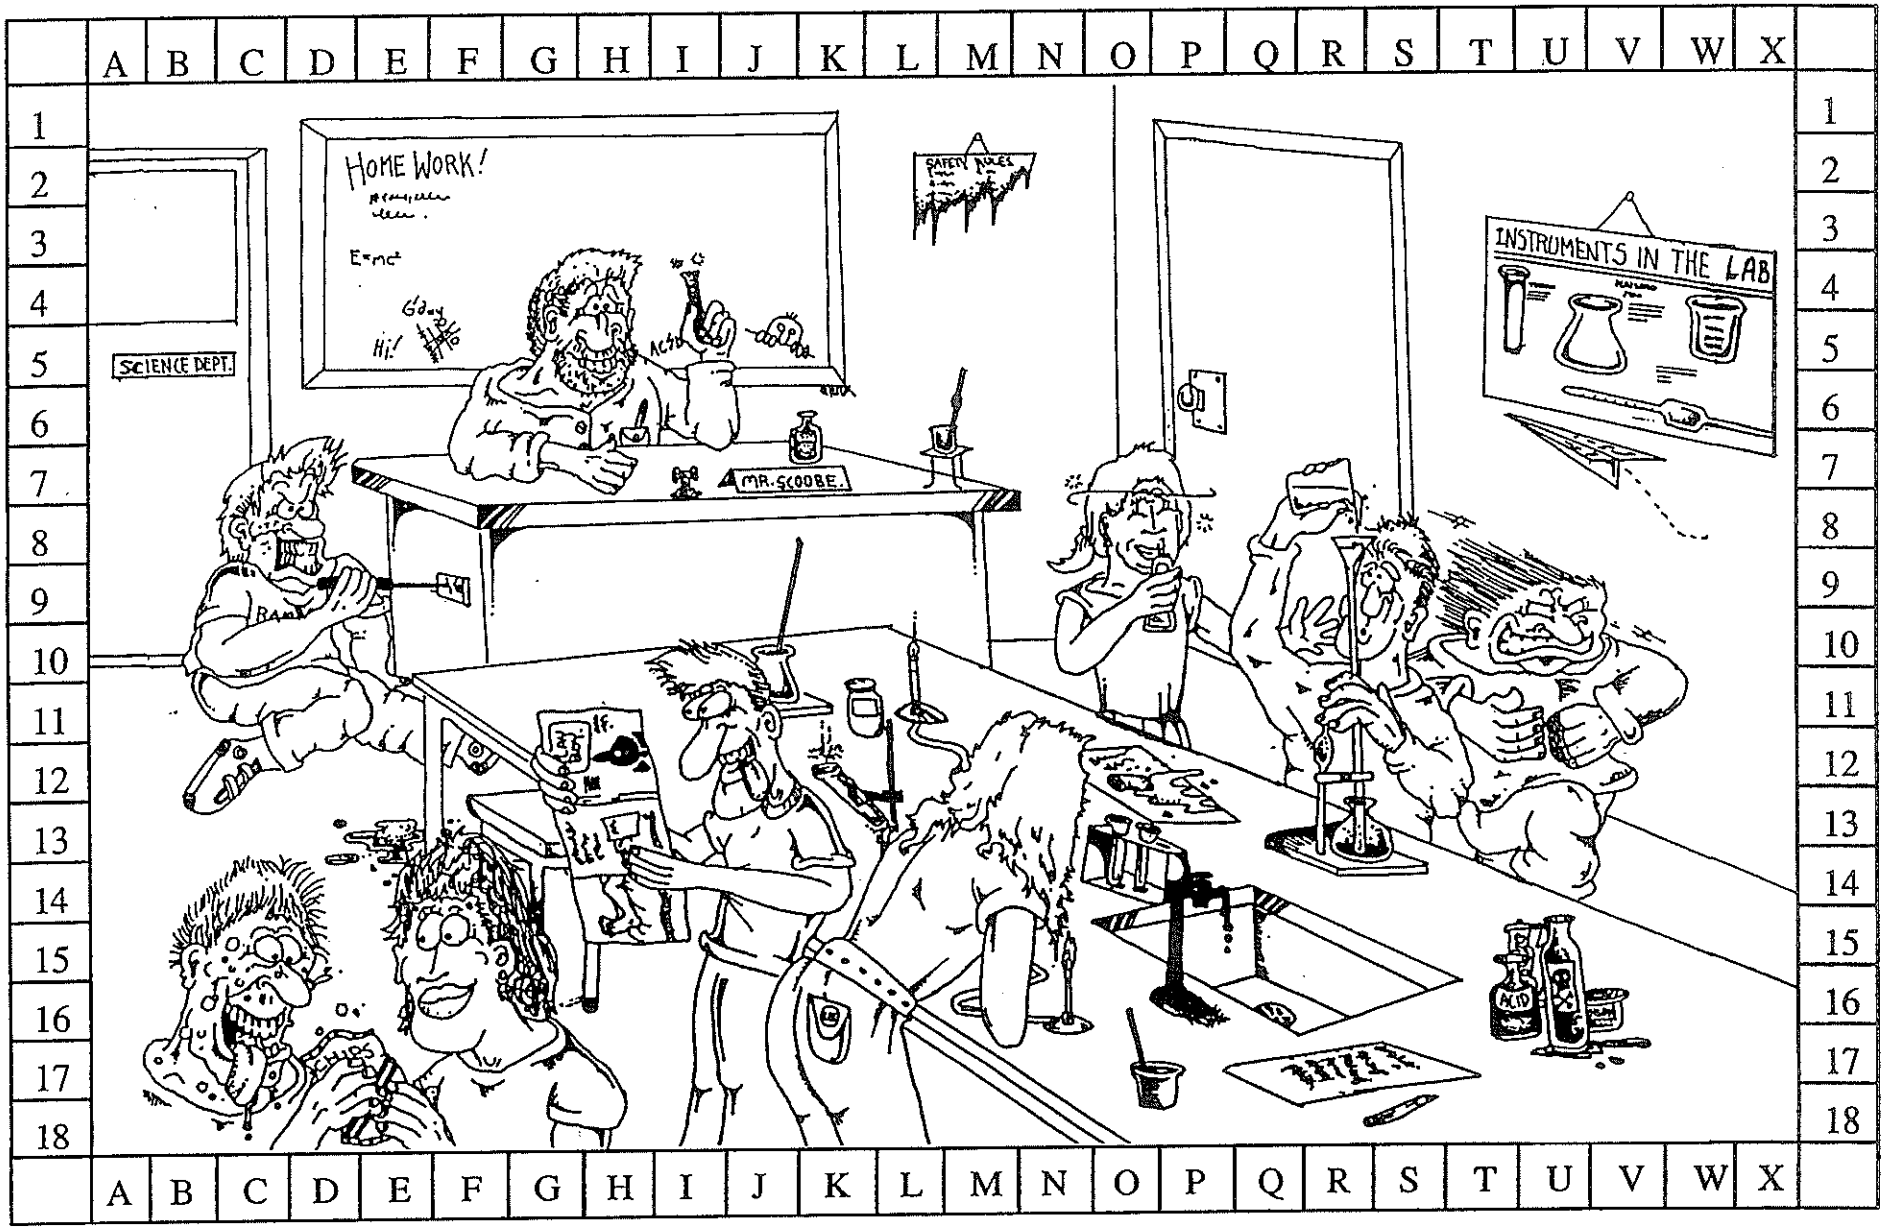

Design a Science Safety Poster for your science laboratory.
It can be of any size.

Some ideas to include:
(a) Dangerous situations.
(b) How to prevent dangerous situations from occurring.
(c) How to treat an injury that could occur.

My project is due on: _____

DANGEROUS SITUATIONS

Look at the diagram below and try to pick out all the dangerous things that are being done in this room. List these together with their grid reference in the space provided on the next page.

GRID REFERENCE	DESCRIBE THE HAZARD	HOW THE HAZARD COULD BE OVERCOME

SAFETY DO'S AND DON'TS

Complete the following list of rules that would help improve safety in the laboratory. Make sure that rules are NOT repeated, nor that any rule considered normal good classroom behaviour is included be the list.

1. I will _____

2. I will _____

3. I will _____

4. I will _____

5. I will _____

6. I will _____

7. I will NOT _____

8. I will NOT _____

9. I will NOT _____

10. I will NOT _____

11. I will NOT _____

12. I will NOT _____
