ATOMS

Use the glossary on page 275 of your textbook to help you write definitions for the following words:-

Word	Definition
Nucleus	
Proton	
Neutron	
Electron	
Electron Cloud	
Atomic Number	
Mass Number	

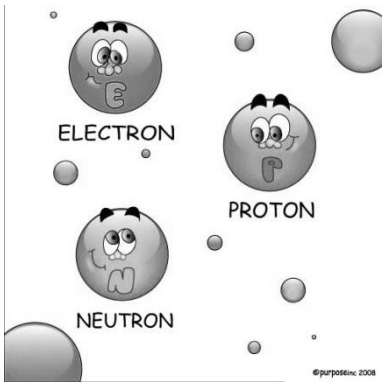

Use page 268 of your textbook to help you, draw a diagram of an atom. Label the following parts:-

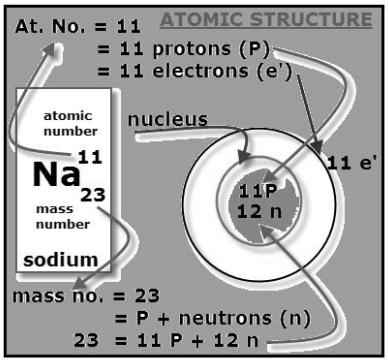

- Nucleus
- Protons
- Neutrons
- Electrons
- Electron cloud

Match the subatomic particle to its correct charge:-

PROTONS	Neutral (no charge)
NEUTRONS	Negative -1
ELECTRONS	Positive +1

Use page 268 & 269 of your text book to help you answer true or false to the following statements:-

Statement	T or F
1. The element sodium is represented by the symbol Na.	
2. The mass number for Na is 23.	
3. The atomic number for Na is 23.	
4. The number of protons is the same as the atomic number.	
5. There are 12 protons in sodium.	
6. The number of neutrons is the mass number plus the atomic number.	
7. There are 12 neutrons in sodium.	
8. The number of electrons is always one more than the number of protons.	
9. There are 12 electrons in sodium.	
10. Protons plus neutrons equals the mass number.	

Complete the following table:-

Element	Symbol	Atomic Number	Mass Number	Number of Protons	Number of Neutrons	Number of Electrons
Oxygen		8	16			
Calcium		20	41			
Copper		29	64			

8 OXYGEN

Pure Oxygen comes in the paired form of O_2.

O

20 CALCIUM

The Calcium in milk helps to strengthen the skeleton.

Ca

29 COPPER

Copper is a red-colored metal that is a good conductor of electricity.

Cu
