# Circulatory System Terminology

**Blood**

Plasma:

_____

_____

Red blood cells:

_____

_____

White blood cells:

_____

_____

Platelets:

_____

_____

Oxygenated:

_____

_____

Deoxygenated:

_____

_____

**Blood Vessels**

Arteries: *Blood vessels that carry blood away from the heart*

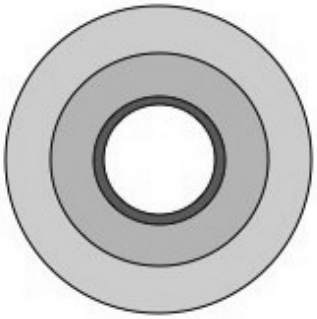

Veins: *Blood vessels that carry blood towards the heart*

Capillaries: *Blood vessels that are one-cell thick that carry blood to the body cells*

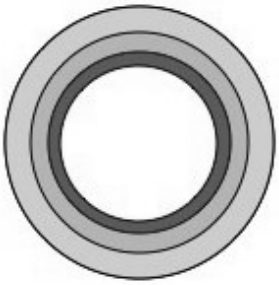

Valves: *Flap-like folds that prevent that backflow of blood. The make sure the blood flows in one direction*

Lumen: *Holes in blood vessels through which blood flows*

1. Identify the following blood vessels.

_____ _____ _____

2. In the box provided, draw the side on view for each blood vessel.
   Draw valves in the blood vessel(s) that contain valves.
