Lesson 4: Cell structure and function

Worksheet:

Which cell am I?

Use the images on the worksheets, ‘Cells online: cell size 1’ and ‘Cells online: cell size 2’ to try to identify which image belongs to each description.

1. Who am I?

I am usually circular in shape.

I am 15–20 micrometres in diameter.

I have a small nucleus that is difficult to see.

I will develop into a blood cell.

I am unstained and do not have a cell wall.

---

2. Who am I?

I am a large, irregular-shaped flat cell.

I have a cell wall.

I protect my organism from fungal and bacterial infections.

I cover the surface of my organism.

I work closely with guard cells that form pores into my organism.

I let light through to the chloroplasts in the cell beneath me.

---

3. Who am I?

I am a small cell that travels around my organism.

I transport oxygen.

I am shaped like a doughnut that hasn’t quite lost its hole.

---

4. Who am I?

I am usually 80–100 micrometres long and 15–20 micrometres wide.

I have a nucleus that is hard to see.

I am surrounded by fine cilia.

I have chloroplasts and a cell wall.

---

5. Who am I?

Name: ..... Class: ..... Date: .....

I am rod shaped.

I do not have a nucleus.

I am a very small cell (1–7 micrometres).

I have a cell wall.

I often form a long string of cells.

---

6. Who am I?

I have a cell wall and a nucleus.

I am over 150 micrometres long and 90 micrometres wide.

I store my extra energy as starch.

You may have eaten me recently.

Which cell has not been mentioned?

Make up a 'Who am I?' for this cell.
