Heart Rates

10 students came into class and their heart rate was recorded immediately, and after 5 minutes. The following results were recorded:

Name	Immediately	After 5 minutes
Tom	76	75
Sarah	109	76
Abdul	68	68
Latif	91	82
Mohamed	118	78
John	73	71
Zara	76	68
Kim	115	72
Bren	124	74
Shay	84	67

1. **Calculate** the average temperature ‘immediately’ and ‘after 5 minutes’.

_____

_____

_____

(2 marks)

2. **Calculate** the range of the ‘immediately’ heart rates.

_____

(1 mark)

3. **Calculate** the range of the ‘after 5 minutes’ heart rates.

_____

(1 mark)

4. **Describe** what happens to Sarah’s, Mohamed’s, Kim’s and Bren’s heart rate after 5 minutes.

_____

_____

_____

_____

_____
_____

(1 mark)

5. **Explain** what may have caused their heart rate to be so much higher than other students.

_____
_____

_____
_____

_____
_____

(2 marks)

6. Graph the results as a column graph. Plot ‘immediately’ and ‘after 5 minutes’ next to each other for each student.

(6 marks)

7. **Describe** the general trend in the results from ‘immediately’ to ‘after 5 minutes’ _____

_____
_____

_____
_____

(2 marks)

8. Which student had the least change in their heart rate?

_____

(1 mark)

9. Which student had the most change in their heart rate?

_____

(1 mark)

10. **Compare** Bren’s range in heart rate to John’s range in heart rate

_____

_____
_____

_____
_____

(2 marks)

11. **Estimate** what might happen to Mohamed's heart rate in another 5 minutes _____

_____
_____

(1 mark)
