Science Laboratory Rules

The laboratory can be a very exciting place to work in but it can be very dangerous if a few simple safety rules are not obeyed.

Complete your set of safety rules by finding the correct word(s) to complete each rule:

1. Never enter a _____ unless given permission by a teacher.
   Do not go into the _____ rooms unless you are accompanied by a teacher.
2. No _____ or pushing. Remove anything that might cause tripping.
3. Keep your books _____ from where you are doing experiments.
4. Keep all equipment well away from the _____ of the bench.
5. Always wear _____ shoes. Wear _____ glasses and _____ coats if you are heating things or working with acids.
6. Never _____ food or _____ any liquid in the laboratory.
7. When heating or mixing substances, never look directly _____ the container or _____ these containers at your friends.
8. Leave all glassware and benches _____ and _____.
9. Always follow _____. Never _____ chemicals without checking with your teacher first.
10. Report any _____ and _____ to your teacher.
11. Follow the _____ procedures for lighting a Bunsen burner.
