Joule Island – Briefing Sheet
Your Task

1. Working with your group you must consider the renewable energy resources available on Joule Island, and decide how you would provide the energy for various tasks.

2.In the lesson you need to make notes to help you write your report.

3.For homework you will write the report which wants to be sent to a Scientific Magazine so use the correct scientific words. In your report you must:

- **Describe the renewable energy resources available on Joule Island**

- **And explain how you would provide the energy to:**
  1. **Heat the huts**
  2. **Supply hot water**
  3. **Cook food**
  4. **Light the buildings at night**
  5. **Produce electricity to run equipment**
  6. **Keep medicine cool in an electric fridge [this MUST work at all times]**
  7. **Methane gas is needed for Bunsen burners**
